This important book is a must for everyone concerned with the heritage and future of Canada's parks. Contributors include an impressive assembly of noted park experts ranging from academic authorities and government parks personnel to concerned nonpolitical park supporters. Since the establishment of Banff National Park in 1885 and Algonquin Provincial Park in 1893, parklands have been part of Canada's heritage. Where other protected areas, such as forest reserves, heritage rivers and greenways, have also been created, a more comprehensive view of the creation and management of conservation areas and marshland is discussed. Cooperative approaches to park management recognize the regional context of parks with respect to local communities, as well as the inclusion of more diverse groups of people, particularly Aboriginals. This work encourages the general public to take an interest in our priceless park heritage.

The classic guide to self-sufficiency, with more than 200,000 copies sold—now fully updated! Anyone who wants to learn basic living skills—the kind employed by our forefathers—and adapt them for a better life in the twenty-first century need look no further than this eminently useful, full-color guide. Countless readers have turned to *Back to Basics* for inspiration and instruction, escaping to an era before power saws and fast-food restaurants and rediscovering the pleasures and challenges of a healthier, greener, and more self-sufficient lifestyle. Now newly updated, the hundreds of projects, step-by-step sequences, photographs, charts, and illustrations in *Back to Basics* will help you dye your own wool with plant pigments, graft trees, raise chickens, craft a hutch table with hand tools, and make treats such as blueberry peach jam and cheddar cheese. The truly ambitious will find instructions on how to build a log cabin or an adobe brick homestead. More than just practical advice, this is also a book for dreamers—even if you live in a city apartment, you will find your imagination sparked, and there's no reason why you can't, for example, make a loom and weave a rag rug. Complete with tips for old-fashioned fun (square dancing calls, homemade toys, and kayaking tips), this may be the most thorough book on voluntary simplicity available.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Instead of taking sides in the long-standing debate between Puritan scholars on the one hand and business historians on the other, Martin identifies strains within Puritanism and the rest of the colonists' culture that both discouraged and encouraged land commerce, both supported and undermined communalism, both hindered and hastened development of the wilderness. He reviews some 60 towns and the activities of 100 town founders. Paper edition (unseen), \$12.95. Annotation copyrighted by Book News, Inc., Portland, OR

Earth First! is one of the most controversial and well known green movements in the world and the driving force behind the anti-road campaigns of the 1990s, made famous by sabotage tactics. Detailed accounts of major anti-road campaigns both in the UK and internationally are included, describing confrontations at Twyford, Newbury, Glasgow, the Autobahn in Germany, and information on the international spread of the Earth First! movement, with details of

campaigns in Australia, Ireland, Germany, France, Holland and Eastern Europe. Earth First! and the Anti-Roads Movement traces the origins of the movement and the history of anti-roads activism in Britain since the 1880s. Radical EF! organisers describe how they took on their green activist identity, why they launched both EF! and the anti-roads movement, and their experiences of dramatic protest. Exposing the tensions between EF! and other green activists, they explain the political and economic influences on and the culture and politics of protest. Showing how green social and political theory can be linked to practical struggles for environmental and social change, Derek Wall investigates key topics of political and sociological interest in Britain and the World today. This is an authoritative account based on passionate and lyrical autobiographical accounts from activists blended with a strong theoretical grounding.
