The purpose of this study is to examine the content of the questions in a number of Advanced Placement Examinations and to attempt to identify content that is related to gender-based performance differences. Free-response questions for ten forms of the AP? Exams in U.S. History, European History, Biology, Microeconomics, and Macroeconomics were studied and the multiple-choice items for four forms of AP U.S. History were also studied. Results indicate that, in the case of U.S. History multiple-choice items, the measures of male

Answers and female performance differences are significantly correlated with item content. In a second analysis, the findings for nine of these content categories were replicated in different forms of the exam, suggesting that these results are of generalizable interest. In the case of the free-response questions for each of the five subject areas, the study identified a significant relationship between item content and gender-based performance differences, but there were not enough items for a replication study. Overall, this study suggests that

An exciting new series of study guides that lets each student design a course of study pitched to his or her individual needs and learning style Each year, more than one million U.S. high school students take one or more advanced placement (AP) exams, and, according to official projections, that number will continue to rise in the years ahead. That is because AP exams confer important benefits on those who do well on them. High AP scores are indispensable to gaining admission to most elite colleges. They provide students with a competitive edge when competing for

Answers and scholarships. And they allow students to bypass required university survey courses, saving on skyrocketing tuition fees. Designed to coincide perfectly with the most current AP exams, Five Steps to a 5 on the Advanced Placement Examinations guides contain several advanced features that set them above all competitors. Each guide is structured around an ingenious Five-Step Plan. The first step is to develop a study plan, the second builds knowledge, the third and fourth hone test-taking skills and strategies, and the fifth fosters the confidence
