Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

active international life. Her meticulous biographer Larry Warren once looked up Anna Sokolow in a few reference books and found that she was born in three different years and that her parents were from Poland except when they were in Russia, and found many other inaccuracies. Drawing on material from nearly 100 interviews, Larry Warren has created a fascinating account and assessment of the life and work of Anna Sokolow, whose nomadic career was divided between New York, Mexico, and Israel. Setting her work on more than 70 dance companies, Anna Sokolow not only pioneered the development of a personal approach to movement, which has become part of the language of contemporary dance, but also created such masterpieces as *Rooms*, dealing with loneliness and alienation, and *Dreams*, which concerns the inner torment of victims of the Nazi Holocaust.
