Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards. Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.

I got into medical school by saying I was black. I lied. Honestly, I am about as black as my sister Mindy Kaling (The Office / The Mindy Project). Once upon a time, I was an ethically challenged, hard-partying Indian American frat boy enjoying my third year of college. That is until I realized I didn't have the grades or scores to get into medical school. Legitimately. Still, I was determined to be a doctor and discovered that affirmative action provided a loophole that might help. The only problem? I wasn't a minority. So I became one. I shaved my head, trimmed my long Indian eyelashes, and applied as an African American. Not even my frat brothers recognized me. I joined the Organization of Black Students and used my middle name, Jojo. Vijay, the Indian American frat boy, became Jojo, the African American affirmative action applicant. Not everything went as planned. During a med school interview, an African American doctor angrily confronted me for not being black. Cops harassed me. Store clerks accused me of shoplifting. Women were either scared of me or found my bald black dude look sexually mesmerizing. What started as a scam to get into med school turned into a twisted social experiment that taught me lessons I would never have learned in the classroom. I became a serious contender at some of America's greatest schools, including Harvard, Wash U, UPenn, Case Western, and Columbia. I interviewed at 11 schools while posing as a black man. After all that, I finally got accepted into medical school. Before I finished this book, I stirred a hornet's nest by telling my story. It has been featured in more than 100 media outlets, including CNN, NBC, TIME, FOX, and Huffington Post. Many loved it, but not everyone approved of what I did. My college classmate Tucker Max (I Hope They Serve Beer in Hell) disapproved. My sister Mindy Kaling furiously declared, "This book will bring shame on our family!" I disagree but I'll let you be the judge.

This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
