condolences—the Posts make it clear why good etiquette matters. Etiquette is a sensitive awareness of the feelings of others, they remind us. Ultimately, being considerate, respectful, and honest is what's really important in building positive relationships. "Please" and "thank you" do go a long way, and whether it's a handshake, a hug, or a friend request, it's the underlying sincerity and good intentions behind any action that matter most.

What does it mean to bring Asia into conversation with current literature on everyday multiculturalism? This book focuses on the empirical, theoretical and methodological considerations of using an everyday multiculturalism approach to explore the ordinary ways people live together in difference in the Asian region while also drawing attention to increasing trans-Asian mobilities. The chapters in this collection encompass inter-disciplinary research undertaken in Australia, Hong Kong, Malaysia,

Singapore and South Korea that explores some core aspects of everyday multiculturalism as it plays out in and across Asia. These include an increase in intraregional movements and especially labour mobility, which demands regard for the experiences of migrants from Burma, China, Nepal, The Philippines and India; negotiations of cultural diversity in nations where a multi-ethnic citizenry is formally recognised through predominantly pluralist models, and/or where national belonging is highly racialized; and intercultural contestation against, in some cases, the backdrop of a

newly emergent multicultural policy environment. The book challenges and reinvigorates discussions around the relative transferability of an everyday multiculturalism framework to Asia, including concepts such as super-diversity, conviviality and everyday racism, and the importance of close attention to how people navigate differences and commonalities in local and trans-local contexts. This book will be of interest to academics and researchers studying migration, multiculturalism, ethnic and racial studies, and to advanced students of Sociology,

eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a

wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

This document lists chronologically and alphabetically by name all nuclear tests and simultaneous detonations conducted by the United States from July 1945 through September 1992. Two nuclear weapons that the United States exploded over Japan ending World War II are not listed. These detonations were not "tests" in the sense that they were conducted to prove that the weapon would work as designed (as was the first test near Alamogordo, New Mexico on July 16, 1945), or to advance nuclear weapon design, or to determine weapons effects, or to verify weapon safety as were the more than

one thousand tests that have taken place since June 30, 1946. The nuclear weapon (nicknamed "Little Boy") dropped August 6, 1945 from a United States Army Air Force B-29 bomber (the Enola Gay) and detonated over Hiroshima, Japan had an energy yield equivalent to that of 15,000 tons of TNT. The nuclear weapon (virtually identical to "Fat Man") exploded in a similar fashion August 9, 1945 over Nagasaki, Japan had a yield of 21,000 tons of TNT. Both detonations were intended to end World War II as quickly as possible. Data on United States tests were obtained from, and verified by, the U.S.
