A refreshing distillation of insights into the human condition, by one of the best-known and most popular philosophers in the UK. Thinking about life, what it means and what it holds in store does not have to be a despondent experience, but rather can be enlightening and uplifting. A life truly worth living is one that is informed and considered so a degree of philosophical insight into the inevitabilities of the human condition is inherently important and such an approach will help us to deal with real personal dilemmas. This book is an accessible, lively and thought-provoking series of linked commentaries, based on A. C. Grayling's 'The Last Word' column in the GUARDIAN. Its aim is not to persuade readers to accept one particular philosophical point of view or theory, but to help us consider the wonderful range of insights which can be drawn from an immeasurably rich history of philosophical thought. Concepts covered include courage, love, betrayal, ambition, cruelty, wisdom, passion, beauty and death. This will be a wonderfully stimulating read and act as an invaluable guide as to what is truly important in living life, whether facing success, failure, justice, wrong, love, loss or any of the other profound experience life throws out.

How we recruit future healthcare professionals is critically important, as the demand for high quality healthcare increases across the globe. This book questions what the evidence tells us about how best to select those most suited to a career in healthcare, ensuring that the approaches used are relevant and fair to all who apply. The editors of this collection take a comprehensive look at the latest research surrounding recruitment and selection into healthcare roles. Each chapter is authored by leading experts and, using international case material, the practical implications for workforce policy are explored. They review the key stages in designing effective selection systems and discuss how best to evaluate the quality of selection processes. Evidence from role analysis studies as well as the effectiveness of different selection methods including aptitude and situational judgment tests, personality assessment and interviews are examined. Chapters also cover approaches to student selection and recruitment for postgraduate trainees through to senior appointments. Finally they highlight contemporary issues in recruitment, including the use of technology, selecting for values, candidate perceptions, coaching issues and how best to promote diversity and widening access.

Across a huge colourful canvas, ranging from the wilds of Scotland to Norway, Denmark and Rome, here is the story of the real MacBeth. Set aside Shakespeare's portrait: read instead of his struggle to make and save a united Scotland. In this impressively researched and vivid portrayal, Tranter belies the popular perception of a savage, murderous ambitious king. Instead, he tells of MacBeth's struggle to make and save a united Scotland; his devotion to his great love, the young Queen Gruoch; the humane laws they fought for; the great battle they were

forced to fight. And the terrible price they paid.
