Kohler Command PRO 999cc engines-Kohler has tested and approved the use of 20W-50 oil in its Command PRO 999cc engines. It has been determined that oil consumption can be reduced by as much as 30% by switching from 10W30 to 20W50. 20W50 is now the recommended oil for most operating temperatures of the Command PRO 999cc engine.

I have a Kohler 17 hp Command on my ZTR Toro 52" deck that I bought used (4 years old??). I've owned the tractor for 12 years mowing 2 acres of grass every 4 days at 1.2 hrs per mow during the summer. I've never had to do anything to the motor other than oil, filter, spark plug, and torqued head bolts. I never expect it to not start!

Troubleshooting Video : Kohler Command Twin Engine ...

Hi,My Cub Cadet 1863 with a Kohler command 18 hp was leaking last year. I too thought it was from the oil filter it even seemed to be loose.BUT it was coming from behind the pto unit the seal was real loose and just popped out when I messed with it.

Describes a vehicle washer that is mounted on a flatbed trailer and can be towed by a 3/4-ton pickup truck when the water tanks are empty. The washer can be used at fire camps where weed seeds need to be removed from vehicles before and after they leave the area. Operators use two high-pressure wands to wash the vehicle's sides, wheels, and wheel wells. One high-pressure underbody washer cleans the vehicle's underbody when the vehicle drives onto the wash mat and another cleans the underbody again as the vehicle drives off. Vehicles are washed on an industrial rubber mat that has 3-inch-high, foam-filled barriers on all sides to hold the wash water. The water is filtered before being reused. The prototype washer was tested at fire camps in Montana during the 2002 and 2003 fire seasons. Operators took 2 to 3 minutes to wash a standard pickup truck, sport utility vehicle, or car and another minute or so longer to wash hotshot crew vehicles, fire engines, and school buses. When vehicles are especially muddy, the wash water cannot be reused without clogging filters and wearing out bypass valves. In such cases, dirty water can be hauled away by trucks for disposal. Drawings for the vehicle washer (MTDC-1020) and an operator's manual (0434-2826-MTDC) are available from the Missoula Technology and Development Center.
