Although the 3208 has been discontinued (1999) there are many still in service; the most popular applications for these engines are marine applications. The Caterpillar TA 3208, 375 HP will drive a 13T boat along at 35 knots. The difference between a NA engine and a highly boosted engine is huge when longevity is the primary goal.

When starting the engine, the force of overfueling spring (14) is enough to push thrust collar (15) to the full fuel position. This lets the engine have the maximum amount of fuel for injection when starting. At approximately 400 rpm, carrier and governor weights (17) create enough force to push overfueling spring (14) together. Thrust collar (15) and spring seat (13) come into contact. From ...
