1. Prologue. The hospitality sector is significant in most contexts and global locations, providing employment to one in 10 people worldwide (World Travel and Tourism Council, 2018). This should and does provide opportunities for satisfying work, given the variety of employment options in the different types of business, the rich social connection and the reward involved in providing reciprocal ...

Drawing on seven integrated design principles, the World Café methodology is a simple, effective, and flexible format for hosting large group dialogue. Each element of the method has a specific purpose and corresponds to one or more of the design principles. World Café can be modified to meet a wide variety of needs.

World Cafe Method :: The World Cafe

This is not a bad thing—some of the people I love most in this world are in this room and I would never have met them if it weren't for this work we do for the bi+ community. The problem arises when we forget that working in community is about more than the people you like and it's about more than the people you already know.

The hospitality and tourism sector is a large and rapidly expanding industry worldwide, and can rightfully be described as a vehicle of globalisation. Hotels are among the cornerstones of the industry often drawing workers from the most vulnerable segments of multicultural labour markets, accommodating and entertaining tourists and business travelers from around the world. This book explores the organisation of work, worker identities and worker strategies in hotel workplaces, as they are located in heterogeneous labour markets being changed by processes of globalisation. It uses an explicitly geographical approach to understand how different groups of workers experience and respond to challenges in the hospitality industry, and is based on recent theoretical debates and empirical research on hotel workplaces in cities as different as Oslo, Goa, London, Las Vegas and Toronto. A multi-scalar analysis is taken where concrete worker bodies and their physical, emotional and embodied labour are seen in relation to, among other aspects: the regulation of national and regional labour markets, city governments with global city ambitions, and global corporate actors and labour migration patterns. The book sheds light on the hotel workplace as a hierarchical and fragmented social space as well as addressing questions on worker mobility, the fragmentation of work, scales of organisation and how workers can help shape the regulation of their industry. This timely volume brings together contributions from international academics and is valuable reading for all those interested in hospitality, tourism, human geography and globalisation.

Talent Management Innovations in the International Hospitality Industry explores a wide range of subjects within the talent management field, including employer branding, creative talent, talent pools, and mentoring initiatives, along with a focus on talent identification, development, and retention.

Viewed through a politico-economic lens, Nordic countries share what is often referred to as the 'Nordic model', characterised by a comprehensive welfare state; higher spending on childcare; more equitable income distribution; and lifelong-learning policies. This edited collection considers these contexts to explore the complex nature of tourism employment, thereby providing insights into the dynamic nature, characteristics, and meaning of work in tourism. Contributors combine explorations of the impact of policy on tourism employment with a more traditional human resources management approach focusing on employment issues from an organizational perspective, such as job satisfaction, training, and retention. The text points to opportunities as well as challenges relating to issues such as the notion of 'decent work', the role and contribution of migrant workers, and more broadly, the varying policy objectives embedded within the Nordic welfare model. Offering a detailed, multi-faceted analysis of tourism employment, this book is a valuable resource for students, researchers and practitioners interested in tourism employment in the region.

Seeing urban politics from the perspective of those who reside in slums offers an important dimension to the study of urbanism in the global South. Many people living in sub-standard conditions do not have their rights as urban citizens recognised and realise that they cannot rely on formal democratic

channels or governance structures. Through in-depth case studies and comparative research, *The Politics of Slums in the Global South: Urban Informality in Brazil, India, South Africa and Peru* integrates conceptual discussions on urban political dynamics with empirical material from research undertaken in Rio de Janeiro, Delhi, Chennai, Cape Town, Durban and Lima. The chapters engage with the relevant literature and present empirical material on urban governance and cities in the South, housing policy for the urban poor, the politics of knowledge and social mobilisation. Recent theories on urban informality and subaltern urbanism are explored, and the issue of popular participation in public interventions is critically assessed. The book is aimed at a scholarly readership of postgraduate students and researchers in development studies, urban geography, political science, urban sociology and political geography. It is also of great value to urban decision-makers and practitioners.

India has been in transition for the last two decades, moving from a mixed economy toward a market economy model, and the Indian hospitality industry is metamorphosing into a mature industry. It is time that the story of the Indian hospitality industry is told. *The Indian Hospitality Industry: Dynamics and Future Trends* tells that story, one defined by the industry's push for growth in revenues and the struggle to match the revenue growth with profitability. The volume includes a selection of insightful chapters that offer research into the multiple dimensions of the Indian hospitality industry. The book covers many segments of the hospitality sector, including hotels, events and catering businesses, and restaurants and coffee shops, both domestic and small mom-and-pop businesses as well as international chains. The opening chapters set the tone for providing an overarching perspective on the status of the industry in terms of the macroeconomic variables and how they may have impacted the health of hospitality businesses in India. The book then goes on to explore a wide variety of issues. The editors and chapter authors are either practitioners themselves or researchers, looking at both domestic and international hospitality business in India and a wide variety of economic factors. The information divulged here will be important for stakeholders, which includes domestic and international hospitality professionals, business leaders, investors, and those in governmental positions, especially in the tourism ministry. The volume informs on the issues and challenges that the hospitality industry in India is up against. The book looks at the dilemma of a industry that responded to the demand growth promise by ramping up supply, only to find that the investments made were received by an actual growth that was way shy of forecasts and left investors with unexpected losses on their profit & loss statements and bloodied balance sheets.

In the modern globalized world of work, society's capitalist and patriarchal norms perpetuate old and create new differences based on gender, class, ethnicity, age, and other social categorizations. This book proposes a novel conceptual framework offering theoretical and methodological insights for thinking through the present and future inequality challenges in the globalized world of work and working life issues in the context of spatio-temporal relations. Bringing together global feminist studies of intersectionality and transnationalism, work-life research, and studies of space, place, and identity, this edited collection responds to the growing interest in peripheries, rurality, and other spaces beyond the urban and business market centres. In crossing the theoretical boundaries between intersectionality and peripherality, this volume brings these concepts together to identify how racism, capitalism and heteropatriarchy operate on bodies in the name of work, particularly as expressed in precarious labour conditions. It also advocates for transnational solidarity as part of feminist ethics, while providing an opportunity to reflect on ways forward for feminist intersectional studies of work and working life, drawing on embodied relationality and a feminist ethics of care. *Working Life and Gender Inequality* explores the intersectional nature of gender, class, race and other inequalities from a global and spatial perspective. It will be of value to researchers, academics, students, managers, consultants, and policy makers in the fields of organizational studies, leadership, feminist and gender studies, working life, intersectionality and transnational feminism.

The dynamics of trust and distrust are central to understanding modern society, social relations, and development processes. However, numerous studies suggest that societal trust and citizen's trust in government and its institutions are on the decline, challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development. Recognizing its importance, the authors for the first time situate trust within the context of tourism development and planning. This volume discusses trust in tourism from different yet intrinsically connected perspectives. Chapters review how diminishing societal trust may have adversely affected tourism planning systems, the role of trust in good tourism governance and sustainable tourism, how trust can be used as a facilitator of participatory tourism planning, political trust in tourism institutions, power and how tourism development can be a basis for trust creation among society members by using social capital theory. In addition, a final section on 'Researching Trust in Tourism Development' means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector, but also methodological aspects of research on trust in the context of tourism development and planning. This significant volume is valuable reading for students, academics and researchers interested in tourism development and planning.

Same-sex marriage is now legal in twenty-nine countries and the subject of continued debate around the world. *The Political Economy of Same-Sex Marriage: A Feminist Critique* considers this debate from a political economy perspective. Rather than engaging directly in the now well-rehearsed social-movement and academic for-and-against debates, this book focuses on processes of institutionalization of same-sex marriage and so-called "rainbow

Get Free A Hospitable World Organising Work And Workers In Hotels And Tourist Resorts Contemporary Geographies Of Leisure Tourism And Lity

families" within (neo)liberal capitalist democracies. It examines how states and markets appropriate same-sex marriage and family to enhance their own political and symbolic capital, consolidating power and profit within existing systems of gendered and raced socioeconomic stratification. Taking a radical feminist, heterodox, qualitative and intersectional approach, this book investigates the political economy of same-sex marriage across three axes: same-sex marriage as institution; same-sex marriage and the market; and the political economy of the "rainbow family". The examination of case studies from different countries and regions enables a comparative analysis that foregrounds cultural, political and economic path dependencies while at the same time highlighting a number of striking commonalities. In all the countries discussed in this book and in most respects, same-sex marriage has been integrated almost seamlessly into a mainstream/malestream political economy of marriage and family and its translation into added market and productive value. The Political Economy of Same-Sex Marriage: A Feminist Critique will be of use to researchers and students alike, and indeed to all those who are curious about the mainstreaming of homosexuality within twenty-first-century capitalist democracies.

This collection offers a timely reassessment of viable ways of addressing poverty across the globe today. The profile of global poverty has changed dramatically over the past decade, and around three-quarters of the poor now live in middle income countries, making inequality a major issue. This requires us to fundamentally rethink anti-poverty strategies and policies, as many aspects of the established framework for poverty reduction are no longer effective. Featuring contributions from Latin America, Africa and Asia, this much-needed collection answers some of the key questions arising as development policy confronts the challenges of poverty and inequality on the global, national and local scale in both urban and rural contexts. Providing poverty researchers and practitioners with valuable new tools to address new forms of poverty in the right way, Poverty and Inequality in Middle Income Countries shows how a radical switch from aid to redistribution-based social policies is needed to combat new forms of global poverty.
