Pico Bogue is the eldest child of a normal family, and when we say 'normal', we mean unique, quirky and occasionally just stark raving mad! Along with his little sister Anna, Pico goes through life with as many certainties as he has questions, making the kind of pertinent observations that only children are capable of. Sometimes challenging, always loveable, there's no end to Pico's mischief, much to the amusement, exasperation and surprise of his long-suffering parents!

"This volume contains Gianfrancesco Pico's Life of his uncle Giovanni Pico and also Giovanni's Oration. Gianfrancesco's Life opens a collection that omits Giovanni's Conclusions but includes the speech that we - unlike Pico - know as an Oration on the Dignity of Man. He wrote the Oration to introduce the Conclusions, but his nephew's editorial decision cut the theses off from the speech that their author had connected with them. Several times in the Oration, the orator mentioned "theorems" to be proposed in the Conclusions: he clearly saw the book and the speech as tools for the same task. Either Gianfrancesco missed his uncle's intentions, which seems unlikely, or he meant to seal off his other writings - including the Oration - from a book that he found embarrassing for himself and his relative and too risky to make public. This is the fact of the matter: Gianfrancesco left the Conclusions unpublished while publishing the Oration in a collection introduced by his Life. Both the speech and the biography are presented here, in this edition, in the same way - apart from the Conclusions: this reflects the situation in 1496 and respects Gianfrancesco's choice, even though his decision blocked understanding of the speech for many years. Today, with access to all the relevant texts in many versions, readers can move from one work to another as needed"--

The Oxford History of Life-Writing: Volume2. Early Modern explores life-writing in England between 1500 and 1700, and argues that this was a period which saw remarkable innovations in biography, autobiography, and diary-keeping that laid the foundations for our modern life-writing. The challenges wrought by the upheavals and the sixteenth-century English Reformation and seventeenth-century Civil Wars moulded British and early American life-writing in unique and lasting ways. While classical and medieval models continued to exercise considerable influence, new forms began to challenge them. The English Reformation banished the saints' lives that dominated the writings of medieval Catholicism, only to replace them with new lives of Protestant martyrs. Novel forms of self-accounting came into existence: from the daily moral self-accounting dictated by strands of Calvinism, to the daily financial self-accounting modelled on the new double-entry book-keeping. This volume shows how the most ostensibly private journals were circulated to build godly communities; how women found new modes of recording and understanding their disrupted lives; how men started to compartmentalize their lives for public and private consumption. The volume doesn't intend to present a strict chronological progression from the medieval to the modern, nor to suggest the triumphant rise of the fact-based historical biography. Instead, it portrays early modern England as a site of multiple, sometimes conflicting possibilities for life-writing, all of which have something to teach us about how the period understood both the concept of a 'life' and what it mean to 'write' a life.

This collection covers the lyrical poetry of Mary Shelley, as well as her writings for Lardner's "Cabinet Cyclopaedia of Biography" and some other materials only recently attributed to her.

The culmination of a lifetime's scholarly work, this pioneering study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present. In her third and final volume Allen covers the years 1500–2015, continuing her chronological approach to individual authors and also offering systematic arguments to defend certain philosophical positions over against others. Building on her work from Volumes I and II, Allen draws on four "communities of discourse"—Academic, Humanist, Religious, and Satirical—as she traces several recurring strands of sex and gender identity from the Renaissance to the present. Now complete, Allen's magisterial study is a valuable resource for scholars and students in the fields of women's studies, philosophy, history, theology, literary

studies, and political science.

Presented to modern readers in English for the first time in 500 years, *The Life of Pico* is a biography of one of the Renaissance's most famous figures: Giovanni Pico de la Mirandola (1463-94). Given More's demanding personal spiritual life, one would assume that More wishes to praise a famous and virtuous man. But what emerges from this book is quite different. Pico turns out to be an extraordinarily virtuous, talented, and wealthy man, but a man nonetheless, who is missing something essential. And so More calls Pico "a very spectacle" of virtue. More sees Pico as very much like himself, as the two turn out to have very similar life experiences. Both carry some scars from difficult or missing relationships with their fathers, both are extremely talented and powerful in their time, and both had been steered toward a religious vocation which they did not embrace. The book is as much a riddle about More as it is an explanation of Pico. More's great-grandson and biographer, Cresacre More, claims that Thomas More as a young man sought to emulate Pico once he decided that his path in life was marriage and not the cloth. The book's first half contains the abridged account of Pico's life. The second half is More's rhymed verse on the 12 rules of spiritual battle, the 12 weapons of spiritual battle, and the 12 properties of a lover, followed by Pico's prayer to God. In the last analysis, this biography of Pico becomes an exercise in the discernment of true virtue, in the contradictions and difficulties one encounters in the immersion into the world, and at the same time, in the life of God.

This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas.

This book brings together many of the world's leading More scholars in order to offer the first comprehensive reassessment in a quarter of a century of this man and his works. The volume presents a many-sided biographical view on More and substantial discussions of nearly every aspect of the More canon. It is a book that will inform both those who have never studied More previously and those already acquainted with More's life and writings. A. D. Cousins is Professor in English and Chair of Department at Macquarie University. Damian Grace is an Associate Professor in the School of History and Philosophy at UNSW.

Stay current with cutting-edge information from the leading feline experts! August's *Consultations in Feline Internal Medicine, Volume 7* takes the popular Current Therapy approach to the latest issues, advances, and therapies in feline care. The 103 new chapters are organized by body systems, making information easy to access, and include more than 800 new detailed photographs, diagrams, and MRI and ultrasound images. Discussions of scientific findings always emphasize clinical relevance and practical application. This edition addresses new topics ranging from feline obesity and food allergies to respiratory mycoplasmal infections. From feline expert Susan Little, with chapters written by more than 130 international specialists, this practical resource will be an invaluable addition to every small animal clinician's library. The Current Therapy format focuses on the latest advances in feline care and includes broad, traditional, and controversial subjects of real clinical importance. Clinically relevant approach is supported with scientific research and promotes practical, progressive clinical management. More than 130 world-renowned contributors provide expert insight across the full spectrum of feline internal medicine. Extensive references make it easy to find additional information about specific topics most important to your practice. 103 ALL-NEW chapters reflect the latest findings, reports, and evidence-based coverage of pressing topics such as: Managing respiratory mycoplasmal infections Continuous glucose monitoring in cats with diabetes Feline food allergy Stem cell therapy for chronic kidney disease Feline idiopathic cystitis Electrochemotherapy Current concepts in preventing and managing obesity Recognition and treatment of hypertensive crises Feline social behavior and personality NEW Emergency and Critical Care Medicine section contains 13 chapters covering complicated and serious internal medical problems. NEW! More than 800 colorful new images clarify concepts and demonstrate clinical examples.
