A Primer on Priming. Priming is the act of providing a stimulus to a subject or audience to improve the likelihood of a desired action on that subject's part. Much in the same way that you would prime the pump on a lawnmower to inject fuel into the carburetor, priming an audience increases the likelihood of a connective spark.

A Short Primer on Innovative Evaluation Reporting highlights why the traditional evaluation report isn't working and what you can do about it. Discover four principles for communicating your results effectively and ways to make your key messages stickier. Learn simple tricks to make your final report more appealing to readers.

How engaging is your evaluation report? Do busy stakeholders actually read it and act on your findings? Evaluators everywhere struggle with these questions. Unfortunately, many still use a lengthy, one-size fits all approach for reporting that doesn't meet the needs of diverse evaluation audiences. A Short Primer on Innovative Evaluation Reporting highlights why the traditional evaluation report isn't working and what you can do about it. Discover four principles for communicating your results effectively and ways to make your key messages stickier. Learn simple tricks to make your final report more appealing to readers. Explore exciting alternatives that not only capture the attention of stakeholders, but inspire them to action.

Often the details of new media get lost in an alphabet soup that usually begins with an "i" - the iPod, the iPad, the iTouch. Yet the essence of new media is not in these devices, but in their use. This short primer shows engineers how to think about new media by focusing on the deeper issues of communicating in this new user-generated era. Readers will grasp the mindset of new media; an understanding that will long outlast the latest social networking tools. It will empower practicing engineers to develop new, powerful ways to help the public to understand what engineers do and why engineering is important; but perhaps most importantly it gives engineers the foundation for reaching the next generation of innovative engineers.

Innovation is a central mechanism in the progression of society and often captures the imagination and enthusiasm of corporate leaders, public policy makers, and so on. However, the cultural, political and social complexities of innovation that extend beyond economic and technological contexts are often overlooked. In this volume, a novel approach to deeply understanding innovation in contexts that range from the socio-cultural to the technological is presented. The fundamental principles and constructs of innovation are identified and described according to an interdisciplinary lens that gives particular focus to a variety of historical examples of innovation. This exploration leads to the development of a learning model that serves as an alternative to mainstream innovation curricula.

The Data Visualization Sketchbook, the latest addition to bestselling author Stephanie D.H. Evergreen's arsenal of data viz tools, provides advice on getting started with sketching and offers tips, guidance, and completed sample sketches for a number of reporting formats including a project page, graphs, dashboards, a one-page handout, slide design, and a report structure. Dr. Evergreen shows how sketching gives people the space to think through not just an individual graphic, but how several graphics could fit together in a composition when creating drafts for infographics and dashboards. The book comprises six complete sets of report templates for you to sketch in and plan your own reporting, and it includes full color qualitative and quantitative "Chart Choosers". This must-have sketchbook helps readers realize mistakes, find solutions quickly, and report data by methods that keep audiences engaged and informed.

Developmental evaluation (DE) offers a powerful approach to monitoring and supporting social innovations by working in partnership with program decision makers. In this book, eminent authority Michael Quinn Patton shows how to conduct evaluations within a DE framework. Patton draws on insights about complex dynamic systems, uncertainty, nonlinearity, and emergence. He illustrates how DE can be used for a range of purposes: ongoing program development, adapting effective principles of practice to local contexts, generating innovations and taking them to scale, and facilitating rapid response in crisis situations. Students and practicing evaluators will appreciate the book's extensive case examples and stories, cartoons, clear writing style, "closer look" sidebars, and summary tables. Provided is essential guidance for making evaluations useful, practical, and credible in support of social change.

A new edition of the essential guide to nonprofit management This intensely practical, comprehensive guidebook is for both leaders new to the nonprofit sector looking for a quick primer on all the issues that matter, as well as established veterans looking to understand how all the pieces fit together. Showcasing practical tips and takeaways, this how-to manual and resource guide provides easy to implement solutions for organizations seeking to expand impact and meet mission. Seasoned veterans including Van Jones, Fair Trade founder Paul Rice, Lynne Twist, Kay Sprinkel Grace, Joan Garry, and more share knowledge and useful insights on all aspects of nonprofit management, including: Fundraising from individuals, companies, and foundations Online fundraising, social networking, and effective use of technology Marketing, public relations, and events Board and volunteer engagement Human resources and career planning Lobbying and advocacy Legal and financial management Leadership and strategic planning This is essential reading for anyone in the nonprofit sector looking for the latest information in the field.

Often the details of new media get lost in an alphabet soup that usually begins with an "i" - the iPod, the iPad, the iTouch. Yet the essence of new media is not in these devices, but in their use. This short primer shows engineers how to think about new media by focusing on the deeper issues of communicating in this new user-generated era. Readers will grasp the mindset of new media; an understanding that will long outlast the latest social networking tools. It will empower practicing engineers to develop new, powerful ways to help the public

understand what engineers do and why engineering is important; but perhaps most importantly this primer gives engineers the foundation for reaching the next generation of innovative engineers.

Reveals the importance of innovation in American global competitiveness, profiling some of today's most compelling young innovators while explaining how they have succeeded through the unconventional methods of parents, teachers, and mentors.

"Documenting the interconnectedness among the crucial milestones of our time, and illustrated with full-color photography, a comprehensive tour of modern science and technology explores the most important innovations and inventions in engineering, physics, medicine, chemistry, biology and more."--Publisher's description.

Knowledge Management focuses on identifying, sharing, storing, and exploiting internal knowledge, whereas Open Innovation is more concerned with sources of external knowledge. However, this simple dichotomy between open and closed approaches is unhelpful and not realistic. Instead, it is the interaction between internal and external knowledge that creates dynamic capabilities and the ability to innovate. In particular, we need to better understand the interactions between internal and external knowledge, and how these influence innovation outcomes under different conditions. This edited volume, *Managing Knowledge, Absorptive Capacity, and Innovation*, provides an opportunity to combine contemporary interests in Open Innovation with the classic notion of absorptive capacity, to better understand how organisations can manage the absorption and exploitation of inbound external sources of knowledge in order to innovate.
