features and the major standard-library components—not, of course, in great depth, but to a level that gives programmers a meaningful overview of the language, some key examples, and practical help in getting started.

[PDF] [EPUB] A Tour of C++ Download

The C++11 standard allows programmers to express ideas more clearly, simply, and directly, and to write faster, more efficient code. Bjarne Stroustrup, the designer and original implementer of C++, thoroughly covers the details of this language and its use in his definitive reference, *The C++ Programming Language, Fourth Edition*. In *A Tour of C++*, Stroustrup excerpts the overview chapters ...

A Tour of C++ - Bjarne Stroustrup - Google Books

Available as eBook and on paper from the publisher. The "tour" is a quick (about 180 pages) tutorial overview of all of standard C++ (language and standard library) at a moderately high level for people who already know C++ or at least are experienced programmers. Available here: [The Preface](#). [Table of Contents](#).

Stroustrup: A Tour of C++

All C++ compiler purveyors are hard at work completing their C++11 support. The "Tour" is a tour of ISO Standard C++, rather than a tour of what's new in C++11 or a tour of your favorite C++ implementation. Also, the tour assumes some familiarity with programming; it is not written for complete novices. Constructive feedback is most welcome.

Tour : Standard C++

The C++11 standard allows programmers to express ideas more clearly, simply, and directly, and to write faster, more efficient code. Bjarne Stroustrup, the designer and original implementer of C++, thoroughly covers the details of this language and its use in his definitive reference, *The C++ Programming Language, Fourth Edition*. In *A Tour of C++* , Stroustrup excerpts the overview chapters from that complete reference, expanding and enhancing them to give an experienced programmer—in just a few hours—a clear idea of what constitutes modern C++. In this concise, self-contained guide, Stroustrup covers most

## Get Free A Tour Of C

major language features and the major standard-library components—not, of course, in great depth, but to a level that gives programmers a meaningful overview of the language, some key examples, and practical help in getting started. Stroustrup presents the C++ features in the context of the programming styles they support, such as object-oriented and generic programming. His tour is remarkably comprehensive. Coverage begins with the basics, then ranges widely through more advanced topics, including many that are new in C++11, such as move semantics, uniform initialization, lambda expressions, improved containers, random numbers, and concurrency. The tour ends with a discussion of the design and evolution of C++ and the extensions added for C++11. This guide does not aim to teach you how to program (see Stroustrup's *Programming: Principles and Practice Using C++* for that); nor will it be the only resource you'll need for C++ mastery (see Stroustrup's *The C++ Programming Language, Fourth Edition*, for that). If, however, you are a C or C++ programmer wanting greater familiarity with the current C++ language, or a programmer versed in another language wishing to gain an accurate picture of the nature and benefits of modern C++, you can't find a shorter or simpler introduction than this tour provides.

*Stepping Westward* is the first book dedicated to the literature of the Scottish Highland tour of 1720-1830, a major cultural phenomenon that attracted writers and artists like Pennant, Johnson and Boswell, William and Dorothy Wordsworth, Coleridge, Scott, Hogg, Keats, Daniell, and Turner, as well as numerous less celebrated travellers and tourists. Addressing more than a century's worth of literary and visual representations of the Highlands, the book casts new light on how the tour developed a modern literature of place, acting as a catalyst for thinking about improvement, landscape, and the shaping of British, Scottish, and Gaelic identities. It pays attention to the relationship between travellers and the native Gaels, whose world was plunged into crisis by rapid and forced social change. At the book's core lie the best-selling tours of Pennant and Dr Johnson, associated with attempts to 'improve' the intractable Gaidhealtachd in the wake of Culloden. Alongside the Ossian craze and Gilpin's picturesque, their books stimulated a wave of 'home tours' from the 1770s through the romantic period, including writing by women like Sarah Murray and Dorothy Wordsworth. The incidence of published Highland Tours (many lavishly illustrated), peaked around 1800, but as the genre reached exhaustion, the 'romantic Highlands' were reinvented in Scott's poems and novels, coinciding with steam boats and mass tourism, but also rack-renting, sheep clearance, and emigration.

Alexis de Tocqueville and Gustave de Beaumont's travels in America in 1831-32 have been retold by C-SPAN. For nine months, the cable TV network retraced the Frenchmen's journey, featuring programming from cities along the route. Now the Tocqueville rediscovery continues with the publication of this unique guide-book. Comprising 47 brief chapters covering cities and small towns that Tocqueville visited, the book allows readers to hear Tocqueville's words while following in his footsteps. Chapters include descriptions of cities and towns, excerpts of what Tocqueville wrote about them, accounts of what Tocqueville and Beaumont did there and details about sights that can be seen today. The book provides telephone numbers and addresses of visitors bureaus, general directions and comparisons of the towns as they are today with what they were like in Tocqueville's era. Traveling

## Get Free A Tour Of C

Tocqueville's America is the perfect companion for armchair traveler and tourist alike.

Offers information on using the C++ programming language using the new C++11 standard, covering such topics as concurrency, facilities, standard libraries, and design techniques.

Two young Regency ladies with special powers must save the monarchy: “ A satisfying blend of magic, mystery, humor, and romance ” (Booklist). Ocean voyages do not agree with wizards, and seasickness during the Channel crossing is the price Cecelia must pay for her budding magical skill. As her nausea ebbs, she is comforted by her new husband, James, and the knowledge that at long last they are on their honeymoon. In their company is Cecelia ’ s cousin Kate, newly minted as the Marchioness of Schofield, and her husband, Thomas. The shared journey guarantees the two couples a happy start to married life, if they can survive the perils of the Continent. In Calais, a mysterious woman visits Cecelia with a package intended for Thomas ’ s mother. Inside is an alabaster flask of noble manufacture, one of the royal artifacts that have been vanishing all over Europe as part of a magical plot against the French crown. This is no simple honeymoon: On their tour of Europe, Kate and Cecelia must save the monarchy from an emperor-in-exile named Napoleon. This ebook features illustrated biographies of Patricia C. Wrede and Caroline Stevermer including rare photos and never-before-seen documents from the authors ’ personal collections.

Bjarne Stroustrup's own C++ In-Depth Series is now available all together in one attractive gift box, at a special reduced price! All books in this series have been hand-picked by Bjarne Stroustrup, the creator of the C++ programming language, as being worthy additions to the C++ literature. They give programmers concise, focused guides to specific topics. The series' practical approach is designed to lift professionals to the next level in their programming skills. They are all written by acknowledged experts. The books included are: Modern C++ Design, by Andrei Alexandrescu Accelerated C++, by Andrew Koenig and Barbara Moo Essential C++, by Stan Lippman Exceptional C++, by Herb Sutter More Exceptional C++, by Herb Sutter These are five great books of use to all C++ programmers. They are gathered into one handsome and sturdy gift box, and they are specially priced at over \$30 off the cost of buying them individually. The C++ In-Depth Box Set will be a welcome gift for any C++ programmer. 0201775816B12112002

A fascinating study of how British travellers experienced, described and represented the cities they visited on the Grand Tour.
