Have you ever asked your students Are you listening? and felt uneasy that their response didn't distinguish listening from hearing? We expect children to spend fifty percent or more of their school day engaged in listening-comprehension activities, yet despite today's emphasis on skills-building in the language arts, most literacy curricula ignore the teaching of this crucial skill. Thanks to Listen Hear!, that's about to change. Michael Opitz and Matthew Zbaracki recognize that teachers have their hands full with reading and writing standards; that's why they've designed Listen Hear! as a handy, friendly resource full of fresh teaching strategies that help you fold multidimensional listening comprehension instruction snugly into your existing reading and read-aloud lessons-without sacrificing room in your crowded curriculum. Listen Hear! gives you everything you need to start teaching listening tomorrow: the research and rationale for teaching it reproducible forms charts that show you at a glance which skills each strategy enhances lists of contemporary children's literature to use in conjunction with the strategies and practical tips for assessment. Thanks to Opitz and Zbaracki, you'll be at the forefront as listening comprehension takes its place in the language arts curriculum, confident that when you ask a student Are you listening? the answer will be a definitive Yes.

Listening is now regarded by researchers and practitioners as a highly active skill involving prediction, inference, reflection, constructive recall, and often direct interaction with speakers. In this new theoretical and practical guide, Michael Rost and JJ Wilson demonstrate how active listening can be developed through guided instruction. With so many new technologies and platforms for communication, there are more opportunities than ever before for learners to access listening input, but this abundance leads to new challenges: how to choose the right input how to best use listening and viewing input inside and outside the classroom how to create an appropriate syllabus using available resources Active Listening explores these questions in clear, accessible prose, basing its findings on a theoretical framework that condenses the most important listening research of the last two decades. Showing how to put theory into practice, the book includes fifty innovative activities, and links each one to relevant research principles. Sample audio recordings are also provided for selected activities, available online at the series website www.pearsoned.co.uk/rosthilson. As a bridge between theory and practice, Active Listening will encourage second language teachers, applied linguists, language curriculum coordinators, researchers, and materials designers to become more active practitioners themselves, by more fully utilising research in the field of second language listening.
