This is the first book exploring the concept of home advantage (HA), the well-known beneficial effect that players and teams derive from performing at home in all sports throughout the world. Despite the fact that the existence of HA dates back to the origins of organized sport in the late 19th century, its root causes and how they operate and interact with each other are still unclear and remain the topic of intense research involving many disciplines, all with the potential objective of improving team and individual performance. This book

covers a broad review of HA divided into three different sections: (i) Section 1 focuses on the theory of HA in sport (the concept of this phenomenon, its quantification, and factors supposedly associated with the HA are explored; (ii) Section 2 analyses the effects of HA in sports related to both male and female athletes, in relation to tactics and strategies, fans, referees, travel, situational variables and the home disadvantage; and (iii) Section 3 studies the HA as it applies to specific sports worldwide such as outdoor sports (football, rugby, cricket, and Australian Football), indoor sports (basketball, futsal, handball, water polo and volleyball), US professional sports, individual sports, racket sports, combat sports, minor sports, disabled sports and the Olympic Games. This book has been written in cooperation

Elite level sport lends itself to a highly competitive environment that encourages players to seek a competitive advantage in order to win. Since competition is an inherent condition that is also considered

desirable in this setting, it may at first glance seem as if cooperation does not have any room in elite level sports. Sustainable cooperation can be mutually advantageous for players, but it only has a chance of coming into fruition if it is also in line with individual players' self-interests. In order for morality and self-interests to align with one another, investment in the conditions is required. Alicia Bockel analyzes ways that players can invest in the conditions of sustainable cooperation for a mutual advantage despite a highly competitive sports environment.

Technological advances and the proliferation of sports content across multiple media platforms have increased accessibility to sports events of all kinds across the world. The result: more power for some sectors and diminished power for many others, to which professionals in the field need to rapidly adapt. This second edition has been substantially updated to explore the impact of COVID-19 disruptions on sports and the growth of women's sports broadcasting and evolving sports, as well as political statements made in sports: Black Lives Matter,

Dennis Deninger draws from his experiences as an expert in the industry to expose how the choices and decisions that are now being made affect the programming, content, storytelling, production, advertising, and delivery of the sports broadcasting that we will see next season and how it will evolve in the years to come. This practical, entertaining book provides insights into sports broadcasting that sports management, media, and journalism
