First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Life cycle engineering explores technologies for shifting industry from mass production and consumption paradigms to closed-loop manufacturing paradigms, in which required functions are provided with the minimum amount of production. This subject is discussed from various aspects: life cycle design, design for environment, reduce-reuse-recycle, life cycle assessment, and sustainable business models. This book collects papers from the 14th International CIRP Life Cycle Engineering Conference, the longest-running annual meeting in the field.

Now in its 179th edition, Laxton's has become a firm favourite in the UK Building Industry. With more prices and more in-depth build-ups, Laxton's offers more practical and complete information than any other price book available This new edition takes into account major price variations that stem frm raw material costs in the last few months. \* Higher-fuel costs have impacted on prices across the board, in particular costs of non-ferrous metals in increased \* Copper sheet and pipe show prince increases of well above 50% in the last year, while zinc, lead and aluminium prices have also risen significantly \* There are savings in plaster and drainage goods, prices are down All the prices in Laxton's are based on the new 3 year Construction Industry Joint council wage rate agreement that came into force at the end of June 2006 \*Saving you time - comprehensive basic price and approximate estimating sections make putting together outline costings quicker and easier \*Saving you effort - all the information you need on each measured item is clearly set out on a single page, with a full break down of costs \*Saving you money - all 250,000 prices are individually checked and updated to make sure that your tender costs are precise
