Math Facts - All 5 Strands! This resource has everything you need for math prep and practise. Includes: 23 Numeration Activities; 18 Measurement Activities; 16 Geometry Activities; 14 Patterning Activities; and 13 Data Management Activities. 96 Pages.

Aligned to Common Core! This Mastering Math book is a complete, condensed course of instruction or review for Second Grade Mathematics. Each Mastering Math book is organized according to these five general curriculum threads: Number Sense & Numeration, Measurement, Geometry & Spatial Sense, Patterning & Algebra, and Data Management & Probability. Each topic area contains individual skills and concepts that match the learning expectations of the curriculum. Mastering Math can be used to support the standard classroom curriculum as every learning expectation in the year's curriculum is included. Mastering Math is also an excellent framework for reviewing the full curriculum at home for students who need extra practice. 99 Pages

Discusses effective ways to improve mathematics skills and to perform well on the Florida Comprehensive Assessment Test (FCAT).

Developed for test-takers who need a refresher, Manhattan Prep's GMAT Foundations of Math provides a user-friendly review of basic math concepts crucial for GMAT success. GMAT Foundations of Math comes with robust online resources, including a practice test, question banks, and interactive video lessons. Written by active instructors with 99th-percentile scores, this guide is designed with the student in mind. Designed to be user-friendly for all students, GMAT Foundations of Math provides: 700+ practice problems for realistic review Easy-to-follow explanations of fundamental math concepts Step-by-step application of concepts to example problems GMAT Foundations of Math is an invaluable resource for any student who wants to cement their understanding and build their basic math skills for the GMAT.

MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS, 6E offers future teachers a comprehensive mathematics course designed to foster concept development through examples, investigations, and explorations. In this text, intended for the one- or two-semester course required of Education majors, Bassarar demonstrates that there are many paths to solving a problem, and sometimes problems have more than one solution. The author presents real-world problems-problems that require active learning in a method similar to how archaeologists explore an archaeological find: they carefully uncover the site, slowly revealing more and more of the structure. Visual icons throughout the main text allow instructors to easily connect content to the hands-on activities in the corresponding Explorations Manual. With this exposure, future teachers will be better able to assess student needs using diverse approaches. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This two-volume set LNCS 12656 and 12657 constitutes the refereed proceedings of the 43rd European Conference on IR Research, ECIR 2021, held virtually in March/April 2021, due to the COVID-19 pandemic. The 50 full papers presented together with 11 reproducibility papers, 39 short papers, 15 demonstration papers, 12 CLEF lab descriptions papers, 5 doctoral consortium papers, 5 workshop abstracts, and 8 tutorials abstracts were carefully reviewed and selected from 436 submissions. The accepted contributions cover the state of the art in IR: deep learning-based information retrieval techniques, use of entities and knowledge graphs, recommender systems, retrieval methods, information extraction, question answering, topic and prediction models, multimedia retrieval, and much more.

Developing communication skills in mathematics is an important part of school curriculum, and many standardized tests require written explanations on how math problems are solved. This book provides teachers strategies to engage students in math discussions, integrate the writing process, and assess their work. A writing checklist and a reflection page are also included. For students, there are opportunities to solve math problems and practice writing explanations on how the problems were solved. The activities focus on number sense and operations, geometry, measurement, and data analysis. A scoring rubric and answer key is also provided.

Reinforce instruction and assess knowledge with full-color games that meet national standards and benchmarks. Students have fun while practicing important skills in math. -- from back cover.

Traces the achievements of many great mathematicians through the ages. Includes problems utilizing elementary math skills.
