The assassin takes advantage of the chaos, enticing an officer into compromising Bennett, then luring another member of Bennett's family into even graver danger. Michael Bennett can't tell what's driving the assassin. But he can tell it's personal, and that it's part of something huge. Through twist after twist, he fights to understand exactly how he fits into the killer's plan, before he becomes the ultimate victim.

March 23, 2003: U.S. Marines from the Task Force Tarawa are caught up in one of the most unexpected battles of the Iraq War. What started off as a routine maneuver to secure two key bridges in the town of Nasiriyah in southern Iraq degenerated into a nightmarish twenty-four-hour urban clash in which eighteen young Marines lost their lives and more than thirty-five others were wounded. It was the single heaviest loss suffered by the U.S. military during the initial combat phase of the war. On that fateful day, Marines came across the burned-out remains of a U.S. Army convoy that had been ambushed by Saddam Hussein's forces outside Nasiriyah. In an attempt to rescue the missing soldiers and seize the bridges before the Iraqis could destroy them, the Marines decided to advance their attack on the city by twenty-four hours. What happened next is a gripping and gruesome tale of military blunders, tragedy, and heroism. Huge M1 tanks leading the attack were rendered ineffective when they became mired in an open sewer. Then a company of Marines took a wrong turn and ended up on a deadly stretch of road where their armored personal carriers were hit by devastating rocket-propelled grenade fire. USAF planes called in for fire support play their own part in the unfolding cataclysm when they accidentally strafed the vehicles. The attempt to rescue the dead and dying stranded in "ambush alley" only drew more Marines into the slaughter. This was not a battle of modern technology, but a brutal close-quarter urban knife fight that tested the Marines' resolve and training to the limit. At the heart of the drama were the fifty or so young Marines, most of whom had never been to war, who were embroiled in a battle of epic proportions from which neither their commanders nor the technological might of the U.S. military could save them. With a novelist's gift for pace and tension, Tim Pritchard brilliantly captures the chaos, panic, and courage of the fight for Nasiriyah, bringing back in full force the day that a perfunctory task turned into a battle for survival. "Ambush Alley" is a gut-wrenching account of unadulterated terror that's hard to read yet impossible to put down. London-based journalist and filmmaker Tim Pritchard, who was embedded with US troops during the initial stages of the American-led invasion of Iraq, paints a compelling picture of one of the costliest battles of the Iraq war that will at turns anger, horrify, and sadden, regardless of one's political views." --The Boston Globe

Ambush marketing is a strategy by which a company or organisation uses their marketing communications to associate themselves with an event without being an official sponsor or authorised partner or licensee. It has become a particular concern in the marketing of major sports events, with international sponsorship and branding properties worth many millions of dollars. Ambush Marketing in Sports is the first book to offer comprehensive analysis of the theoretical and practical implications of ambush marketing. Drawing on cutting-edge empirical research data, the book outlines an innovative model for understanding ambush marketing and offers practical advice for all stakeholders, from sponsors and event organisers to media organisations. The book examines the opportunities and the risks of ambush marketing, assesses the legal, ethical and business dimensions, and offers advice for preventing ambush marketing in a range of contexts. Fully supported throughout with examples and cases from major international sports events, such as the FIFA World Cup and the Olympic Games, this book is important reading for any student, researcher or practitioner with an interest in sport marketing, sport business or event management.

This book undertakes a critical examination of commercial rights to sports mega-events (focusing on sponsorship), the exclusivity of such rights and the legal implications of the modern mega-event sponsorship model. It examines ambush marketing of events and the law's treatment of ambushing (specifically in the form of sui generis event legislation) in a review of 10 major jurisdictions selected on the basis of the importance of the events they are to host in the near future or have hosted recently, and the relevant domestic legislation. It critically examines the legitimacy of such commercial rights protection by means of the use of laws in the context of accepted principles of intellectual property law, competition law and human rights law. Specifically, it questions the legitimacy of the creation of statutory 'association rights' to mega-events, and considers potential future developments in respect of the law's treatment of mega-event commercialisation. Valuable for practitioners and academics (in the fields of sportslaw/sponsorship/marketing/intellectual property law); sports administrators (sports governing bodies); corporate sponsors of sports and other events; potential mega-event host governments and law-makers; civil rights organisations.
