The McFarland/Wise: Essentials of Anatomy & Physiology Laboratory Manual is intended for the one-semester A&P Laboratory course, which is often taken by allied health students. It may be used with the Saladin/McFarland: Essentials of Anatomy & Physiology textbook, or as stand-alone essentials of anatomy & physiology manual in conjunction with any one-semester A&P textbook. This full-color manual is designed for students with minimal backgrounds in science who are pursuing careers in allied health fields. It includes 25 exercises that support most areas covered in a one-semester A&P course, allowing instructors the flexibility to choose those exercises best suited to meet their particular instructional goals. Each exercise is based on established Learning Outcomes and contains hands-on activities with the essentials-level student in mind.

This lab manual can be used with Saladin's Human Anatomy text, or it can be used independently. The illustrations are labeled; therefore, students do not need to bring their lecture texts to the lab. The lab manual can be used in either a one-term or a full-year course. The illustrations are outstanding, and the balanced combination of line art and photographs provides effective coverage of the material. The amount of lecture material in the manual is limited, so there is little material included that is not part of the laboratory experience.
