The urinary system consists of the kidneys, ureters, bladder, and the urethra. The kidney consists of millions of functional units called nephrons. The urinary system removes wastes from the body and regulates blood volume and blood pressure. It also

# Download Free Anatomy And Physiology Urinary

System Study Guide  
controls the levels of electrolytes and metabolites in body fluids and regulates blood pH.

Urinary System - Anatomy & Physiology

Anatomy and Physiology – The Urinary System Humans have the

# Download Free Anatomy And Physiology Urinary

System Study Guide

capacity to excrete toxins. For

instance, the urinary system is major excretory system of the body. It helps in homeostasis specifically in electrolyte balance, fluid balance and acid-base balance.
