For years, dozens of books, documentaries, and magazine articles have targeted the fast food industry as the cause for many of society's ills, ranging from the obesity epidemic to the proliferation of dead-end jobs. Now, hospital dietitian Lisa Johansen makes the bold case that the fast food industry is actually a positive force in society. Johansen takes the reader from the industry's scrappy, entrepreneurial beginnings to its emergence as a global business generating hundreds of billions of dollars annually. Far from a blight on society, the fast food industry has distinguished itself by providing a product that meets high standards of quality and safety, often healthier than meals served at home and in sit-down restaurants. The myth of the "McJob" is debunked by true-life cases of corporate titans who succeeded by virtue of the fast-food chains' practice of promoting from within. And, relying on her years of counseling patients at one of the nation's largest health networks, Johansen shows the reader just how easily fast food can be incorporated into a healthy lifestyle. Lively and informative, FAST FOOD VINDICATION destroys the media myths and paints the true picture of an industry that touches the lives of millions.

Booklist Top 10 Sports Books for Youth: 2015 Pound by sweaty pound, Greg Dunsmore's plan is working. Greg is steadily losing weight while gaining the material he needs to make the documentary that will get him into film school and away from the constant jeers of " Dun the Tun. " But when Greg captures footage of brutal and bloody hazing by his town's championship-winning lacrosse team, he knows he has evidence that could damage as much as it could save. And if the harm is to himself and his future, is revealing the truth worth the cost?

A seamless teaching and learning experience for the 2017 Victorian Curriculum for Science This combined print and digital title provides 100% coverage of the 2017 Victorian Curriculum for Science. Using scientific evidence, this straightforward guide provides real answers to common health and fitness claims. This handy guide gives you real answers to all these and many more common health and fitness misconceptions. Plus, it provides the scientific evidence that separates the fact from fiction for every question, like: • Does everyone need to drink at least 8 glasses of water per day? • Do high-protein diets increase the risk of coronary heart disease? • Are all calories created equal? • Will performing sit-ups shrink my waistline? • Will exercise get rid of cellulite? • Does calcium intake enhance weight loss? • Is bottled water safer to drink than tap water? • Does eating grapefruit speed up fat loss?

For thirty days, Morgan Spurlock ate nothing but McDonald ' s as part of an investigation into the effects of fast food on American health. The resulting documentary earned him an Academy Award nomination and broke box-office records worldwide. But there ' s more to the story, and in Don ' t Eat This Book, Spurlock examines everything from school lunch programs and the marketing of fast food to the decline of physical education. He looks at why fast food is so tasty, cheap, and ultimately seductive—and interviews experts from surgeons general and kids to marketing gurus and lawmakers, who share their research and opinions on what we can do to offset a health crisis of supersized proportions. Don ' t eat this groundbreaking, hilarious book—but if you care about your country ' s health, your children ' s, and your own, you better read it.

This text presents and explains theories from the epistemological perspectives of the researchers who use them. Rather than representing a specific theoretical paradigm (social scientific, interpretive, or critical), the author team presents the three major paradigms in one text, each writing in his or her area of expertise. Every theory is explained in a "native" voice, from a position of deep understanding and experience, improving clarity for readers. The text also provides insights on using communication theory to address real-life challenges. Considering that theories are developed to guide scholarly research more than to provide practical advice, this feature of the book helps students create realistic expectations for what theories can and cannot do and makes clear that many theories can have practical applications that students can use to their advantage in everyday life. Offering a comprehensive exploration of communication theories through multiple lenses, Exploring Communication Theory provides an integrated approach to studying communication theory and to demonstrating its application in the world of its readers.

The Calmanifesto of Happiness 'One of the kindest people I have ever met - a beautiful dancer and a beautiful person' Kevin Clifton 'Be good, be kind, be more like Susan Calman' Kirstie Allsopp 'Be kind to yourself - read this book, keep it on your bedside table or on your Kindle - even Kindle has the word kind in it' Sandi Toksvig 'Full of wisdom and humour, with the soft underbelly of the profound' Fi Glover 'It's a warm, funny and delightful book

that is sure to cheer even the grumpiest curmudgeon in your life' Woman and Home Susan Calman's enthusiasm at being on Strictly Come Dancing was an inspiration to all of us. Cheer Up Love, Susan's first book, had a clear aim: to help people understand depression. Sunny Side Up has a similarly clear path: to persuade people to be kinder to each other and spread more joy. These are extremely difficult and confusing times - people are cross and shouty. It's exhausting! But more than anything, people like Susan, people who don't hate other people, are apologising for the way that they think. Susan wants to make sure that they don't. She wants them to know that it's ok to love people and that kindness is something wonderful and brilliant. Above all, she wants them to bring on the joy. So the mission is simple. To get the nation to join her in not being negative. To bring back joy, kindness and community, to find that joy in the little things in life and defeat the hate and fear. Susan is a one-woman army of hope and joy, and she's ready to lead the nation in a different direction.

From the concert stage to the dressing room, from the recording studio to the digital realm, SPIN surveys the modern musical landscape and the culture around it with authoritative reporting, provocative interviews, and a discerning critical ear. With dynamic photography, bold graphic design, and informed irreverence, the pages of SPIN pulsate with the energy of today's most innovative sounds. Whether covering what's new or what's next, SPIN is your monthly VIP pass to all that rocks.

Faced with crowded markets, flat growth and growing consumer cynicism, brand marketers are looking for ways to deepen the emotional connection between their brands and customers. This book uses interviews and case studies to show how belief-led brands such as Google, Zara and Camper have outstripped the growth of their peers by igniting passion among employees and consumers alike. These passion brands show the way to marketing in the 21st century. Drawing on both research and academic theory, the authors provide a practical, systematic approach to the business of transforming brands into passion brands. "Creating Passion Brands" shows what really counts at the heart of branding today.
