Effective science teaching requires  
creativity, imagination, and innovation. In  
light of concerns about American science  
literacy, scientists and educators have  
struggled to teach this discipline more  
effectively. Science Teaching

them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.
