Get insights and information on how you can help your students thrive with topics including supporting under-served and struggling students, meeting diverse learning needs and more.

This accessible guide offers school leaders a wealth of strategies to foster a culture where educators engage with young people to encourage college readiness and career success. Based in research and best practices, Mentoring is a Verb explains how to build effective mentoring programs as well as encourage educators to individually mentor students. Olwell breaks down the key elements it takes to forge lasting relationships with students and addresses ways to connect to at-risk students. Packed with actionable steps, this book gives you the tools to help your students set high expectations and goals, recognize and address barriers to success, plan for the future, and reach their post-graduation aspirations.

New technologies provide new ways of delivering the programs and services of higher educational (HE) institutions. This book examines how social media are redefining what university communities are and the purposes and practices of the various functional areas in HE.

Presents the report "A Nation at Risk: The Imperative for Educational Reform," provided by the National Commission on Excellence in Education. Includes findings and recommendations about the U.S. educational system. Lists members of the Commission and includes the Commission's charter and a schedule of its events. Contains commissioned papers, hearing testimony, and other presentations to the Commission. Offers information on notable programs and lists acknowledgments. Provides information on ordering the printed version and offers access to an ASCII version of the document for downloading. Links to the U.S. Department of Education home page and related publications.

This book has basic contact information for the trades and technical skills including apprenticeship programs and job websites. I cover community colleges and vocational schools in book #2. The trades are really big because they're always there regardless of what high-tech industries come and go. Whenever I go jogging, I always see the plumbing trucks, the electrical trucks, the contractor trucks, the carpet cleaners, window installers, etc. No matter what happens, people always need those basic services. I looked around for an indepth vocational-trades book. I couldn't find one. Here is my attempt at a good comprehensive vocational trades book. Even in the trades, be very wary about what you decide to go to school for. I've had friends spend a few years taking a certain vocational program like electronic technician or computer tech only to end up not being able to find a job in their field.

This book revisits skills development policies and points to new directions for making training programs more effective and responsive in increasingly competitive labor market.
