The Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN) asserts that the availability of registered nurses (RNs) and other health care professionals who are skilled in fetal heart monitoring (FHM) techniques, including auscultation and electronic fetal monitoring (EFM), is essential to maternal and fetal well-being during antepartum care, labor, and birth.

"Fetal heart rate monitoring is widely used by almost every obstetrician as a way to document the case and to help decrease health care costs. This is a short reference on the physiologic benefits, instrumentation, application and interpretation of fetal heart rate monitoring. The second half of the book uses actual FHR strips and cases to illustrate various anomalies (fetal distress, fetal distress in prematurity, fetus with CNS dysfunction). Several new drugs have been introduced for use during labor that effect FHR"--Provided by publisher.

Co-published with the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN), this book is a comprehensive clinical resource for practicing perinatal nurses and an excellent staff educator's guide and textbook. It provides commonly accepted guidelines for practice and evidence-based care and includes algorithms to support decision-making. Numerous photographs complement the text and summary boxes highlight key points. Appendices provide patient care examples and practice guidelines. This edition has been extensively revised and updated. New features include more than 650 end-of-chapter review questions and answers and selected AWHONN protocols.

This comprehensive text emphasizes the practical application of electronic fetal monitoring (EFM). Case scenarios link various clinical situations with data interpretation to promote critical thinking. Relevant, up-to-date research helps readers develop problem solving skills; identify optimal treatment responses; and become familiar with the disease and nondisease conditions in pregnant patients that affect fetal health. More than 170 EFM strips complement

## Where To Download Awhonn Fetal Monitoring Guidelines

the text. This edition has more monitoring strips and a new chapter on electronic record-keeping by a well-known expert. *Electronic Fetal Monitoring: Concepts and Applications, Second Edition* is a must-have purchase for anyone responsible for EFM interpretation.

This second edition provides the core knowledge required to skillfully carry out all daily clinical responsibilities. Current, updated coverage examines human reproduction, genetics, high-risk pregnancies, labor and delivery risk, and much more.

Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, *Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition* prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation – included free with each new copy of the book – mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is

## Where To Download Awhonn Fetal Monitoring Guidelines

included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines.

Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

Co-published with the Association of Women's Health, Obstetrics & Neonatal Nurses (AWHONN), this comprehensive clinical text/reference provides a current, concise and accurate source of guidance for perinatal nurses and clinical specialists. Readers will find clear explanations and specific guidelines for all aspects of high-risk labor and delivery, with information that's easy to locate and use, including the most current material on obstetric critical care. Coverage includes AWHONN's protocols and procedures; and sample protocols and flowsheets enhance quick referencing. New chapters in this edition on: Invasive Hemodynamic Monitoring, Mechanical Ventilation, Sepsis, Acute Renal Failure, Thyroid Disorders, and more! A Brandon-Hill Recommended Title.

"AWHONN's Nursing Care and Management of the Second Stage of Labor, third edition Evidence-Based Guideline is a must have for nurses working in any birthing setting. This guideline provides updated and detailed practice recommendations for assisting women through the second stage of labor based on the best available evidence. It emphasizes the value of non-directed, open glottis pushing and upright positioning as essential nursing practice interventions that support the normal physiologic process of labor. The third edition also includes a section highlighting how this guideline was implemented and helped to improve outcomes for women during the second stage of labor. This Evidence Based Guideline was developed by nurses for nurses with comprehensive review of literature from multiple disciplines including nursing, medicine, and the behavioral health sciences"--Publisher's description.

Rev. ed. of: Mosby's pocket guide to fetal monitoring / Susan Martin Tucker, Lisa A. Miller, David A. Miller.
