Do you want to have complete control over all the choices and decisions regarding your data centers and cloud? Well, AWS services are the solution, and you can enjoy automated benefits without any manual intervention. If you are going to create something, which already exists over the internet, why will the clients choose you? The only goal is to focus on your data and leave everything else on AWS. They are securely stored on servers. Restricted and privileged access, data encryption, protection of personal data... Amazon is the industry leader in establishing and respecting security standards. Amazon offers attractive prices, especially for small businesses that do not have the resources to install and maintain servers on-site or even absorb the sometimes-exorbitant cost of renting dedicated servers in a conventional data center. Amazon AWS pricing remains flexible and adapts based on the services and storage volume used. However, calculating pricing is not the easiest. Amazon then offers a calculation simulator for AWS.
