This book presents the research-based case that Learner Centered Teaching (LCT) offers the best means to optimize student learning in college, and offers examples and ideas for putting it into practice, as well the underlying rationale. It also starts from the premise that many faculty are much closer to being learner centered teachers than they think, but don't have the full conceptual understanding of the process to achieve its full impact. There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen. LCT keeps all of the good features of a teacher-centered approach and applies them in ways that are in better harmony with how our brains learn. It, for instance, embraces the teacher as expert as well as the appropriate use of lecture, while also offering new, effective ways to replace practices that don't optimizing student learning. Neuroscience, biology and cognitive science research have made it clear that it is the one who does the work who does the learning. Many faculty do too much of the work for their students, which results in diminished student learning. To enable faculty to navigate this shift, Terry Doyle presents an LCT-based approach to course design that draws on current brain research on cognition and learning; on addressing the affective concerns of students; on proven approaches to improve student's comprehension and recall; on transitioning from "teller of knowledge" to a "facilitator of learning"; on the design of authentic assessment strategies - such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate; and on successful communication techniques. The presentation is informed by the questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked; and on the response from an equal number of regional, national and international conferences at which he has presented on topics related to LCT.

Peterson's Master the CLEP is the essential prep guide for non-traditional students who are looking to begin a college career and for current students who want to save on tuition costs by testing out of certain courses. When you use this guide, you will get a basic overview of the CLEP, a look at the general examinations and the vast number of subject-specific exams, tips for registering and preparing for the CLEP, and a guide to interpreting your test scores. This is followed by extensive reviews of the five CLEP general examinations, with pre- and post-tests and subject matter overviews that will help you pinpoint your strengths and weaknesses. The Appendix will go into detail about a number of CLEP subject exams.

Describing property and appraising it are essential concepts to master for passing the Real Estate License Exam, because a legal description of a property is a necessary component for both a real estate sales contract and a lease. Peterson's Master the Real Estate License Exam: Describing Property and Appraising It provides you with important real estate information on the metes and bounds system, lot and block system, rectangular survey system, categories of value, principles of appraising value, and factors that influence value. occupations Comprehensive list of the latest EMT, first-aid, and crisis management requirements Expert advice on acing the oral interview and information on psychological testing

Fundamenta Krestomatio By L. L. Zamenhof

Learn how to tackle the hardest parts of taking a test—stress, anxiety, self-doubt—with *Beyond the Content*. In this quick read, you'll learn how mindfulness can help you conquer the voices in your head, study better, and approach the test with confidence. Most test prep books, textbooks, and classes miss the mark by only focusing on strategy and content. This essential guide tackles the other half of test prep: mindfulness and your mental performance. Mindfulness is widely embraced in the business and athletic communities as a valuable technique to optimize performance. Author Logan Thompson, an expert in both test prep and mindfulness, says that it's about time the test prep community embraces it as well. In the book, Thompson explains, "The other half of test prep is the world of fleeting thoughts and emotions, always flickering, always murmuring inside your head, usually going unnoticed and unremarked upon. They shape our perceptions and perspectives. And, they dictate our performance on tests. The other half of test prep is happening all the time, whether we like it or not. Your mental and emotional state, your surfacing memories, your underlying beliefs are always there. The good news is that, by acknowledging the other half of test prep, exploring it, and working with it, you can gain access to your full potential."
