This is a new content planner designed exclusively for teachers, examiners and education content creators. Create and build a bank of your own unique questions for your own resources and practice papers. Design and record questions focused towards the needs of your students. Create and compile questions for a multiple choice question test. Keep this

planner with you and write in your ideas as soon as you have them to review later. In this book you will find 100 pages of templates for writing multiple choice practice questions. There are 60 half page multiple choice questions pages, with two templates per page making room for 120 questions. You can create up to four answers per question. After this, there are 40 full page multiple choice questions pages, allowing for longer questions and up to ten answers per question. Each planning template contains space to write your question and allocate marks. Need a picture? There is a blank sketch area in each template for drawings and graphs There is a place to allocate a question number, the paper it will be included in, the qualification it is relevant for and a space to identify the relevant learning objection being assessed. Is there a particular question you have seen in a textbook, published paper or online that you would like to reference or model? No problem! At the top section of each template you can note the location of an inspiration or reference question. There is a place for additional notes. Each multiple choice template contains the following: - Space to write your question - A blank sketch area - 4 or 10 multiple choice answer boxes to create your answers - Decision boxes about the nature of your answer, whether it is the correct answer, a distractor, a misconception or another type of answer - An area to write down any reference or inspiration question - A place for the question number, paper allocation, relevant qualification, assessment objectives covered and additional notes. Ultimately, we know you will want to compile appropriate questions together and write them up neatly on a computer producing a fantastic new resource At the rear of the planner are six question compilers. This enables you to list and page reference up to thirty questions per resource and order them how you would like, before transferring to a computer to create your new practice activity. The Multiple Choice Question Planner is designed primarily for mathematics and STEM subject teachers, lecturers and examiners, but is flexible enough to be used by any subject teacher. Additionally, there is also an example of how to use each section on the template to make it clear how you can get the most out of the planner. Contains 120 half page templates, 40 full page templates and 6 compilers so you can create up to six, 30 question multiple choice tests per planner. Size 8.5 by 11 inches (216 by 279 mm).

This book is concerned with the mobile, ubiquitous, and pervasive learning arena. It present a collection of works corresponding to four categories: reviews, studies, conceptual proposals, and approaches. As a result of the submission and revision processes eight manuscripts were accepted and organized into the aforementioned four parts as follows: ·Review: a couple of chapters offer a survey of related works. One concerns with the diversity of mobile, ubiquitous, and pervasive labor, where interested findings are unveiled based on correlations. Other focuses on adaptive and adaptable architectures that are suitable to implement ubiquitous learning sceneries, whose contribution represents a model of a domain specific architecture. ·Studies: two chapters explore issues related to the effect of question styles made through smartphones and tablets, and the disposition of teachers to exploit mobile devices at classroom. ·Conceptual: a pair of chapters offer a given proposal, the first to develop adaptive mobile learning systems by means of a framework based on contextual information; and the second with the purpose to share some guidelines of how to apply cloud computing in the development and operation of mobile. ·Approaches: two chapters apply a specific paradigm as part of a whole application and reveal the achieved impact. One of them uses augmented reality to encourage children to learn about trees as context-sensitive

informal learning. The other, immerses children in playing a learning game to learn math by cooperating between members team and interacting through mobile devices. This volume will be a source of interest for researchers, practitioners, professors, and postgraduate students aimed at updating their knowledge and finding targets for future work in the mobile, ubiquitous, and pervasive learning field!

Improve Reading Comprehension AND Consumer Skills... at the Same Time! These easy-to-use & visually interesting digital Task Cards inform students of the ways they can use a credit card as well as the responsibilities of having a credit card. The in-depth information is presented in small, easy-to understand chunks. Students of multiple skill levels will be able to successfully access the information. A step-by-step approach makes the task cards ideal for explicit instruction, life skills classes, remediation, transition students, special education, and more. Using a Credit Card can be used as a stand-alone unit of instruction or can be used as a companion teaching unit along with Credit Card Basics and Getting a Credit Card. "What is Buying on Credit?" This set of task cards starts off by explaining what it means to buy something on credit. "What is a Credit Limit?" Understanding a credit limit is basic information each credit card user needs to have. "Ways to Use a Credit Card" Detailed information is given in this section of task cards explaining how to use a credit card in person, over the phone, and online. "Credit Card Account Statement" How to read and understand an account statement is presented in a simple, step-by-step format using sample account statements. "Responsible Credit Card Use" This last set of task cards emphasizes the importance of paying your credit card bill on time and not overspending or going over your credit limit. READING SKILLS: Students will get lots of practice reading and interpreting the information presented as they are challenged to find facts, locate information, and read for detail. These quick Google task cards prepare students for learning about what it takes to get a credit card. VERSATILE LESSONS: These multiple-choice and fill-in-the-blank activities require no writing... making them ideal for daily lessons, review, progress monitoring, enrichment, quiz games, and task cards. All activities are multiple choice or fill in the blank. VERSATILE & EASY-TO-USE GOOGLE SLIDES: We've done the work for you! Simply download these Google Slides and assign them to your students. Assign them all, or just today's daily lesson! For additional flexibility, these slides can also be printed for in-class use! Each lesson includes 10 multiple choice questions making them ideal for assessment, review, quiz cards and more... These easy-to-use lessons do not require writing or typing. All questions are multiple choice or fill-in-the-blank which requires students to drag a circle or word to provide the correct answer. BENEFITS OF GOOGLE SLIDES: If you've been looking for a way to integrate technology into your lessons, this is your answer. And the best part is you don't have to print, cut, laminate, or replace when you lose pieces....it's ALL DIGITAL! HOW DO GOOGLE SLIDES WORK? Students read each high-interest story on a computer or iPad then answer the comprehension questions right on their copy of the slides. Teachers can see students' answers in real time, or review them later. Slides can also be printed and used as colorful classroom worksheets. You can assign a set of slides to each student, so that they have their own personal packet.

Consistent with previous editions of An Introduction to Physical Science, the goal of the new Thirteenth edition is to stimulate students' interest in and gain knowledge of the physical sciences. Presenting content in such a way that students develop the critical reasoning and problem-solving skills that are needed in an ever-changing technological world, the authors emphasize fundamental concepts as they progress through the five divisions of physical sciences: physics, chemistry, astronomy, meteorology, and geology. Ideal for a non-science majors course, topics are treated both descriptively and quantitatively, providing instructors the flexibility to emphasize an approach that works best for their students. Important Notice: Media content referenced within the product description or the product text may not be

available in the ebook version.

Life Skills Activities | Consumer Skills | Reading | Task Cards This is a Google Slides product. Click link in first slide to download file. Improve Reading Comprehension AND Consumer Skills... at the Same Time! These easy-to-use & visually interesting digital Task Cards introduce students to the basics of credit cards. Adobe Captivate 3: The Definitive Guide, the follow-up to Wordware's popular Macromedia Captivate: The Definitive Guide, steps you through all the procedures needed to create Flash movies based on any software on your desktop. You'll learn how to create Flash movies, edit individual screens, add and edit sound, even add interactivity (with or without grading) for complete customization. The expanded e-learning chapter in this edition discusses a variety of ways to build quizzing functions with individual questions and question pools. A chapter on branching shows how to move slide elements on a visual display, and how to create paths through a movie that give each viewer a unique experience. This book covers everything from getting the software installed and activated, manipulating the movie files, adding and editing audio, and building quizzes, all the way to delivery mechanisms of the final output and integrating your movies with other applications. With this book, learn to install and configure Captivate; create and edit movies; add, delete, edit, and rearrange slides; incorporate audio and interactivity in your movies; create e-learning content through the use of question slides and branching functions; use a variety of Captivate tools including templates and MenuBuilder.

This comprehensive study investigates the consequential validity of the central Chinese Proficiency Test- HSK from micro- (classroom) to macro- (society) perspectives. It advances the scope of validity studies and addresses pedagogical and methodological issues in Chinese as a Second/foreign/heritage (CSL) teaching and learning, but also complements efforts made to broaden the understanding of foreign language education. This work also provides implications for HSK's future development and revision, and will also help HSK developers clarify how the test can be used and help the test users to build their assessment literacy.
