BMW's 2.5-liter M20 is one its most popular engines and is plentiful; being used in the 325i and 525i of the late 80s. In new condition, the engine makes 168 hp and 164 lb-ft of torque at 5800 rpm and 4300 rpm, respectively. With a rather low compression ratio of less than 9 to 1, the motors are robust and only require regular maintenance.

In this volume fifteen musicologists from five countries present new findings and observations concerning the production, distribution and use of music manuscripts and prints in seventeenth-century Europe. A special emphasis is laid on the Düben Collection, one of the largest music collections of seventeenth-century Europe, preserved at the Uppsala University Library. The papers in this volume were initially presented at an international conference at Uppsala University in September 2006, held on the occasion of the launching of The Düben Collection Database Catalogue on the Internet. For the first time, the entire collection had been made accessible worldwide, covering a vast number of musical and philological aspects of all items in the collection.
