March 1945 edition of Bombardiers' Information File BIF 1-6-3. When you receive BIF revisions you are required by AAF Regulations 62-15 and 15-24 to do the following: 1. Sign the receipt portion of Form 24BA (which is always enclosed as the first sheet of every revision). Hand this receipt at once to the operations office where you receive the revision. 2.

Read the directions on the envelope which contains the revision. 3. Remove from your BIF and destroy the pages which are listed on the envelope. Don't try to short-cut and place the revision pages in at the same time you remove the replaced pages. You are sure to make mistakes. Do it one step at a time. Go clear through your book and take all pages out that are listed on the envelope. This is vital. 4. Read and study the revision sheets until you understand them. 5. Place the revision sheets in their proper place in your copy of BIF. 6. When you have done all of the above, and not until you have done it all properly, sign the compliance section of Form 24BA and return it to your Operations Officer so that it may be placed in your Form 5 file. You have 30 days (by AAF Regulation 15-24) in which to do all of the above. If you have

neglected any of the steps listed you have violated regulations and are subject to disciplinary action.

Throughout the first year of the war in the Pacific during World War II the USAAF was relatively ineffective against ships. Indeed, warships in particular proved to be too elusive for conventional medium-level bombing. High-level attacks wasted bombs, and torpedo attacks required extensive training. But as 1942 closed, the Fifth Air Force developed new weapons and new tactics that were not just effective, they were deadly. A maintenance officer assigned to a B-25 unit found a way to fill the bombardier's position with four

0.50-cal machine guns and strap an additional four 0.50s to the sides of the bomber, firing forward. Additionally, skip-bombing was developed. This called for mast-top height approaches flying the length of the target ship. If the bombs missed the target, they exploded in the water close enough to crush the sides. The technique worked perfectly when paired with “strafe” B-25s. Over the first two months of 1943, squadrons perfected these tactics. Then, in early March, Japan tried to reinforce their garrison in Lae, New Guinea, with a 16-ship convoy – eight transports guarded by eight destroyers. The Fifth Air Force pounced on the convoy in the Bismarck Sea. By March 5 all eight transports and four destroyers had been sunk This volume examines the mechanics of skip-bombing combined with a strafing B-25,

assessing the strengths and weaknesses of the combatants (B-25 versus destroyer), and revealing the results of the attacks and the reasons why these USAAF tactics were so successful.

#1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Look for special features inside. Join the Random House Reader's Circle for author chats and more. In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and,

beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will.
