The student determines the cost of individual sources of financing, including long-term debt, preferred stock, and common stock. The cost of debt is adjusted for Eco Plastics' 40% tax bracket. The company is ...

Designed to augment managerial and cost accounting study, Cases in Cost Management develops the ability to apply cost analysis to decision-making situations. Thoroughly tested and proven highly effective, the cases provide challenging and fun problems that help build skills with managerial and cost accounting techniques. Based on real-life scenarios, the cases give the opportunity to analyze the situation, decide which accounting concept is most appropriate, and apply the concept as the manager of a firm.

BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals, entrepreneurs and corporate executives. Every month, BLACK ENTERPRISE delivers timely, useful information on careers, small business and personal finance.

Unlock the Secrets of Your Old Family Photos! Historical family photos are cherished heirlooms that offer a glimpse into the lives of our ancestors. But the images, and the stories behind them, often fade away as decades pass - the who, when, where and why behind the photos are lost. In this book, photo identification expert and genealogist Maureen A. Taylor shows you how to study the clues in your old family photos to put names to faces and recapture their lost stories. Inside, you'll learn how to: • Determine the type of image you have - from common paper prints to stereographs to historical daguerrotypes, ambrotypes, and tintypes • Use clothing, accessories, and hairstyles to date the image in the correct decade • Research photographer's imprints to narrow down when and where the photo was taken • Compare facial features in multiple photos to confirm identity and family resemblance • Interview family members to gather more information about the image • Identify props in the photo to create context for the image Each chapter includes dozens of historical photos to illustrate key points and provide clear examples. Charts, timelines and resource lists make it easy to find the exact information you need. Dozens of case studies show you how to apply the techniques in the book to real-life photo research projects. The answers to your family photo questions are closer than you think. Let this book help you start finding them today.

An estimated 8 million metric tons (MMT) of plastic waste enters the world's ocean each year - the equivalent of dumping a garbage truck of plastic waste into the ocean every minute. Plastic waste is now found in almost every marine habitat, from the ocean surface to deep sea sediments to the ocean's vast mid-water region, as well as the Great Lakes. This report responds to a request in the bipartisan Save Our Seas 2.0 Act for a scientific synthesis of the role of the United States both in contributing to and responding to global ocean plastic waste. The United States is a major producer of plastics and in 2016, generated more plastic waste by weight and per capita than any other nation. Although the U.S. solid waste management system is advanced, it is not sufficient to deter leakage into the environment. Reckoning with the U.S. Role in Global Ocean Plastic Waste calls for a national strategy by the end of 2022 to reduce the nation's contribution to global ocean plastic waste at every step - from production to its entry into the environment - including by substantially reducing U.S. solid waste generation. This report also recommends a nationally-coordinated and expanded monitoring system to track plastic pollution in order to understand the scales and sources of U.S. plastic waste, set reduction and management priorities, and measure progress.
