Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Le Jura. Ses (derniers ?) grands arbres. Ses chutes de neige (devenues rarissimes). Ses lacs (pollués ?). Ses usines (délocalisables ?). Ses zones isolées - et c'est un bonheur - où les caméras de surveillance ne sont pas encore installées et où les smartphones n'ont pas de réseau. Ses territoires oubliés ici et là où la faune, les vouivres et les fées existent encore un peu. Ses petites villes. De nos jours, en 30 nouvelles mêlant réalisme brutal et poésie souveraine des forêts, un voyage singulier au pays du sapin président.

Elle et lui. Et la supérette. Un couple dans l'ordinaire des jours. Publié en version abrégée (et ici dans son intégralité) dans le recueil *Sapin président*, un double portrait brut, entre l'intime et l'universel.

An argument that we have a moral duty to explore other planets and solar systems--because human life on Earth has an expiration date. Inevitably, life on Earth will come to an end, whether by climate disaster, cataclysmic war, or the death of the sun in a few billion years. To avoid extinction, we will have to find a new home planet, perhaps even a new solar system, to inhabit. In this provocative and fascinating book, Christopher Mason argues that we have a moral duty to do just that. As the only species aware that life on Earth has an expiration date, we have a responsibility to act as the shepherd of life-forms--not only for our species but for all species on which we depend and for those still to come (by accidental or designed evolution). Mason argues that the same capacity for ingenuity that has enabled us to build rockets and land on other planets can be applied to redesigning biology so that we can sustainably inhabit those planets. And he lays out a 500-year plan for undertaking the massively ambitious project of reengineering human genetics for life on other worlds. As they are today, our frail human bodies could never survive travel to another habitable planet. Mason describes the toll that long-term space travel took on astronaut Scott Kelly, who returned from a year on the International Space Station with changes to his blood, bones, and genes. Mason proposes a ten-phase, 500-year program that would engineer the genome so that humans can tolerate the extreme environments of outer space--with the ultimate goal of achieving human settlement of new solar systems. He lays out a roadmap of which solar systems to visit first, and merges biotechnology, philosophy, and genetics to offer an unparalleled vision of the universe to come.

Crossing the boundaries of genre with its unrivalled storytelling, Diana Gabaldon's new novel is a gift both to her millions of loyal fans and to the lucky readers who have yet to discover her. In the ten years

since her extraordinary debut novel, *Outlander*, was published, beloved author Diana Gabaldon has entertained scores of readers with her heart-stirring stories and remarkable characters. The four volumes of her bestselling saga, featuring eighteenth-century Scotsman James Fraser and his twentieth-century, time-travelling wife, Claire Randall, boasts nearly 5 million copies in the U.S. The story of *Outlander* begins just after the Second World War, when a British field nurse named Claire Randall walks through a cleft stone in the Scottish highlands and is transported back some two hundred years to 1743. Here, now, is *The Fiery Cross*, the eagerly awaited fifth volume in this remarkable, award-winning series of historical novels. The year is 1771, and war is approaching. Jamie Fraser's wife has told him so. Little as he wishes to, he must believe it, for hers is a gift of dreadful prophecy – a time-traveller's certain knowledge. To break his oath to the Crown will brand him a traitor; to keep it is certain doom. Jamie Fraser stands in the shadow of the fiery cross – a standard that leads nowhere but to the bloody brink of war.
