With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

Creating mouth-watering food images requires more than just a love of food and access to a kitchen. With the popularity of food blogs and photography how-tos, it's tempting to think that anyone can photograph food, but it's another thing entirely to shoot for a tight ad layout with the pressure of your client watching over your shoulder. Commercial food photographer Teri Campbell has been called a "lighting master," and in this beautifully illustrated book, he not only shares his detailed lighting set-ups and shooting techniques for a wide range of food and drink shots, but also offers candid advice on how to set up a studio, use the right equipment, market your work, find clients, bid on assignments, hire food and prop stylists, and communicate effectively with everyone on the set. Campbell shares his expertise on dozens of commercial assignments—from shooting beignets on location in New Orleans, to creating perfect ice tea pours, to photographing beans on real flames in his studio. Learn how he creates dynamic compositions, uses studio strobes, and arranges light diffusers, reflectors, fill cards, and mirrors, to create the perfect capture. Campbell also discusses his post-processing techniques in Adobe Camera Raw and Adobe Photoshop to create images that are irresistible. This guide for intermediate and advanced users provides the insider details to help you expand your photography skills or turn your passion for food and images into a professional career.
