Sensor Technologies: Healthcare, Wellness and Environmental Applications explores the key aspects of sensor technologies, covering wired, wireless, and discrete sensors for the specific application domains of healthcare, wellness and environmental sensing. It discusses the social, regulatory, and design considerations specific to these domains. The book provides an

application-based approach using real-world examples to illustrate the application of sensor technologies in a practical and experiential manner. The book guides the reader from the formulation of the research question, through the design and validation process, to the deployment and management phase of sensor applications. The processes and examples used in the book are primarily based on research carried out by Intel or joint academic research programs. “ Sensor Technologies: Healthcare, Wellness and Environmental Applications provides an extensive overview of sensing technologies and their applications in healthcare, wellness, and environmental monitoring. From sensor hardware to system applications and case studies, this book gives readers an in-depth understanding of the technologies and how they can be applied. I would highly recommend it to students or researchers who are interested in wireless sensing technologies and the associated applications. ” Dr. Benny Lo Lecturer, The Hamlyn Centre, Imperial College of London “ This timely addition to the literature on sensors covers the broad complexity of sensing, sensor types, and the vast range of existing and emerging applications in a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud-based ‘ big data ’ analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of 'big data' down to the personal level of individual life and health. ” Dermot Diamond Director, National Centre for Sensor Research, Principal Investigator, CLARITY Centre for Sensor Web Technologies, Dublin City University "Sensor Technologies: Healthcare, Wellness and Environmental Applications takes the reader on an end-to-end journey of sensor

technologies, covering the fundamentals from an engineering perspective, introducing how the data gleaned can be both processed and visualized, in addition to offering exemplar case studies in a number of application domains. It is a must-read for those studying any undergraduate course that involves sensor technologies. It also provides a thorough foundation for those involved in the research and development of applied sensor systems. I highly recommend it to any engineer who wishes to broaden their knowledge in this area!"
Chris Nugent Professor of Biomedical Engineering, University of Ulster

The book focuses on implications of traditional and processed foods for autism spectrum disorder (ASD) intervention and management. Numerous phytonutrients and pharmacologically active compounds in edible natural products and diet could influence and offer protection to neuronal dysfunction that occurs due to ASD. The neuroprotective effects of various fruits, vegetables, nuts and seeds phytochemicals, and other natural bioactive ingredients against ASD and related conditions are discussed. Topics such as the possible neuroprotective mechanism of action of these foods and the therapeutic role of antioxidants in relation to ASD are addressed. This book also highlights the scope of using anti-inflammatory agents and antioxidants to promote neurogenesis and improve other symptoms in ASD. It emphasizes personalized nutritional approaches with dietary management of neurodevelopmental disorders/ASD cases. Information in this book is relevant to researchers in the field of complementary and alternative medicine, nutraceuticals, neuroscience, agriculture, nutrition, and food science. This volume is beneficial to students of varying levels, and across multiple disciplines.

night... After escaping the slaughter of her clan at a young age, Scottish noblewoman Sabrina Verrick provides for her siblings by living a double life, until the night she encounters the Duke, and her secret and all she holds dear is threatened... He's so disillusioned, he's completely vulnerable... With his inheritance at stake, Lucien, Duke of Camareigh, sets a trap for the Scottish beauty with the piercing violet eyes, never imagining what will happen when the trap is sprung... As their lives become irreversibly entangled, Lucien and Sabrina become each other's biggest threat, as well as their only salvation... Praise for Laurie McBain: "Ms. McBain's flare for the romantic intermingled with suspense will keep the reader riveted to the story until the last page." -Affaire de Coeur "Vivid sense of description, colorful characters... I found myself happily lost in the magnificence of the storytelling." -Los Angeles Herald Examiner Dominick Trilogy: Moonstruck Madness Chance the Winds of Fortune Dark Before the Rising Storm

Nanotechnology has already demonstrated surprising potential for improving the performance of construction materials and many of these recent developments were facilitated by NICOM symposia. The NICOM5 proceedings will cover the emerging opportunities and future use of nanotechnology in construction and will illustrate the broad potential for application of nanotechnology to challenging problems involving materials and infrastructure.

The beloved New York Times bestselling Dominick Trilogy Rhea blinked in disbelief. "What an insufferable man you are. And whether you are, as you would have me believe, a marquis, or

whether you are a tinker, I would still find you the rudest, most vulgar individual I have ever had the misfortune to encounter." "Well done, my dear. I am impressed by this splendid show of ladylike disdain, feigned though it be, but well done nonetheless. But the light of truth has revealed you in my cabin. Now, how do you explain yourself out of that?" Lady Rhea Claire, kidnapped and shipped to the Colonies as an indentured servant, manages with wits and courage to escape...straight into the arms of a ruthless English pirate. For all his worldly ways, Dante Leighton, Marquis of Jacqobi and captain of the Sea Dragon, never expected to discover his redemption and his greatest treasure within the amethyst eyes of a beautiful English refugee. In this remarkable little book, Andre Comte-Sponville introduces the reader to the western philosophical tradition in a series of sparkling chapters on the 'big questions'. In doing so he reveals the essential bones of philosophical thought and shows why philosophy is relevant in our day-to-day lives. In his brilliant and concise writing on morality, politics, love, death, knowledge, freedom, God, atheism, art, time, Man, and wisdom, he inspires the central question of philosophy - how should we live? - and provides the reader with signposts towards a happier, wiser life.
