Designed to be a go-to reference for assessment and treatment planning in the clinic, this is a clear and concise handbook for students and practitioners of dry needling, or medical acupuncture. It includes: - Comprehensive medical illustrations demonstrating trigger point locations and associated pain referral patterns - Easy-to-follow instructions and photographs demonstrating musculoskeletal dry needling points and electroacupuncture techniques - Dedicated section on the acupuncture treatment of tendinopathy - Vital information on palpation and correct needling techniques - Practical guidance on best practice, safety and treatment planning - Overviews of the history and key principles of Traditional Chinese medicine and acupuncture - Up-to-date research on the effect of acupuncture in the treatment of MSK conditions, myofascial pain, trigger points (MT/PS), fascia and pain. The book will be an essential aid for osteopaths, physiotherapists, sports rehabilitators, chiropractors, massage therapists, as well as traditional acupuncturists wishing to understand a Western approach on acupuncture. Other health professionals incorporating, or looking to incorporate dry needling into their treatment programme, will also find this book an invaluable resource.

Effective risk communication is essential to the well-being of any organization and those people who depend on it. Ineffective communication can cost lives, money and reputations. Communicating Risks and Benefits: An Evidence-Based User's Guide provides the scientific foundations for effective communications. The book authoritatively summarizes the relevant research, draws out its implications for communication design, and provides practical ways to evaluate and improve communications for any decision involving risks and benefits. Topics include the communication of quantitative information and warnings, the roles of emotion and the news media, the effects of age and literacy, and tests of how well communicators meet the organization's goals. The guide will help users in any organization, with any budget, to make the science of their communications as sound as the science that they are communicating.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The architect's primary source for information on designing for egress, evacuation, and life safety, Egress Design Solutions, Emergency Evacuation and Crowd Management Planning, is written by proven experts on egress issues. Meacham and Tubbs are engineers with Arup, an international firm with a stellar reputation for quality design and engineering. Their book examines egress solutions in terms of both prescriptive and performance-based code issues. A portion of the book focuses on techniques for providing egress design solutions and for coordinating egress systems with other critical life safety systems. Another part reviews historic and recent tragic life-loss fire events. As such, this is easily the most comprehensive take on the subject, written especially for architects.
