Chasm City: Gothic cyberpunk at its dark best Originally posted at Fantasy Literature Chasm City (2001) is the fourth Alastair Reynolds book I've read in his REVELATION SPACE series, though it is a stand-alone and a much better book. The main trilogy (Revelation Space, Redemption Ark, Absolution Gap) featured a lot of good hard SF world-building, but was heavily weighed down by clunky characters, dialogue, and extremely bloated page-count.

Return to the dazzling world of Revelation Space with this British Science Fiction Award-winning space opera about a young man hell-bent on revenge on the surface of a twisted, disease-corrupted planet. The once-utopian Chasm City -- a domed human settlement on an otherwise inhospitable planet -- has been overrun by a virus known as the Melding Plague, capable of infecting any body, organic or computerized. Now, with the entire city corrupted -- from the people to the very buildings they inhabit -- only the most wretched sort of existence remains. For security operative Tanner Mirabel, it is the landscape of nightmares through which he searches for a lowlife postmortal killer. But the stakes are raised when his search brings him face to face with a centuries-old atrocity that history would rather forget. One of Locus and Science Fiction Chronicle's "Best SF Novels of the Year"

Alastair Reynolds returns to his bestselling Revelation Space universe with two novellas of interstellar exploration. "Diamond Dogs" The planet Golgotha -- supposedly lifeless -- resides in a remote star system, far from those inhabited by human colonists. It is home to an enigmatic machine-like structure called the Blood Spire, which has already brutally and systematically claimed the lives of one starship crew that attempted to uncover its secrets. But nothing will deter Richard Swift from exploring this object of alien origin... "Turquoise Days" In the seas of Turquoise live the Pattern Jugglers, the amorphous, aquatic organisms capable of preserving the memories of any human swimmer who joins their collective consciousness. Naqi Okpik devoted her life to studying these creatures -- and paid a high price for swimming among them. Now, she may be the only hope for the survival of the species -- and of every person living on Turquoise...

Part science fiction thriller, part interstellar adventure, and part noir crime, Century Rain is an astonishing international bestseller of "blistering powers and

style" (SF Revu). Three hundred years from now, Earth has been rendered uninhabitable due to the technological catastrophe known as the Nanocaust. Archaeologist Verity Auger specializes in the exploration of its surviving landscape. Now, her expertise is required for a far greater purpose. Something astonishing has been discovered at the far end of a wormhole: a mid-20th-century version of Earth, preserved like a fly in amber. Somewhere on this alternate planet is a device capable of destroying both worlds at either end of the wormhole. And Verity must find the device, and the man who plans to activate it, before it's too late -- for the past and the future of two worlds. *Century Rain* is a jaw-droppingly good SF thriller, packed with pace, adventure, brilliant storytelling and with twists that will keep you guessing to the end.

In the third book of the legendary *Revelation Space* trilogy, the last remnants of humanity realize that forging an alliance with a greater and even more mysterious alien force may be their only chance for survival. The Inhibitors were designed to eliminate any life form reaching a certain level of intelligence -- and they've targeted Humanity. War veteran Clavain and a ragtag group of refugees have fled into hiding. Their leadership is faltering, and their situation is growing more desperate. But their little colony has just received an unexpected visitor: an avenging angel with the power to lead mankind to safety -- or draw down its darkest enemy. And as she leads them to an apparently insignificant moon light-years away, it begins to dawn on Clavain and his companions that to beat one enemy, it may be necessary to forge an alliance with something much worse . . . "Absolution Gap is a good as it gets, and should solidify Alastair Reynolds' reputation as one of the best hard SF writers in the field." -- SF Site

Prefect Tom Dreyfus investigates a murderous attack on one of the space habitats of the Glitter Band--a crime that has left nine hundred people dead--and uncovers a plot by a mysterious entity seeking total control of the region.

This story is not part of the *Revelation Space* series. It was developed from notes for an unwritten novel and maybe one day that novel will be completed, for we need to know the fate of the Earth. This story presents one of the more unusual apocalyptic ideas.

*Pushing Ice* is the brilliant tale of extraordinary aliens, glittering technologies, and sweeping space opera from award-winning science fiction author Alastair Reynolds. 2057. Humanity has raised exploiting the solar system to an art form. Bella Lind and the crew of her nuclear-powered ship, the *Rockhopper*, push ice. They mine comets. And they're good at it. The *Rockhopper* is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The *Rockhopper* is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it falls forever out of reach. In accepting this mission, she sets her ship and her crew on a collision course with destiny -- for Janus has more surprises in store, and not all of them are welcome.

*Elysium Fire* is a smoldering tale of murderers, secret cultists, tampered memories, and unthinkable power, of bottomless corruption and overpowering idealism from the king of modern space opera. Ten thousand city-state habitats orbit the planet Yellowstone, forming a near-perfect democratic human paradise. But even utopia needs a police force. For the citizens of the Glitter Band that organization is Panoply, and the prefects are its operatives. Prefect Tom Dreyfus has a new emergency on his hands. Across the habitats and their hundred million citizens, people are dying suddenly and randomly, victims of a bizarre and unprecedented malfunction of their neural implants. And these "melters" leave no clues behind as to the cause of their deaths. . . As panic rises in the populace, a charismatic figure is sowing insurrection, convincing a small but growing number of habitats to break away from the Glitter Band and form their own independent colonies.

In the second book of *The Inhibitor Trilogy*, Alastair Reynolds pushes the boundaries of science fiction and "confirms his place among the leaders of the hard-science space-opera renaissance" (*Publishers Weekly*). Late in the twenty-sixth century, the human race has advanced enough to accidentally trigger the Inhibitors -- alien killing machines designed to detect intelligent life and destroy it. The only hope for humanity lies in the recovery of a secret cache of doomsday weapons -- and a renegade named Clavain who is determined to find them. But other factions want the weapons for their own purposes -- and the weapons themselves have another agenda altogether . . .
