Chargemaster also plans to install wireless charging units in the next two years to support the new cars and taxis that are expected to be coming to market with inductive charging. Chargemaster ' s introduction of more than 250 new Ultracharge units across the UK in 2017 has already commenced, with the rapid charge units installed across multiple Q-Park locations in London.

These two volumes contain a selection of twenty-one essays that cover recent research in the history of Chinese religion and the implications for the study of Chinese religion and society in general.

Au regard du Code de l ' environnement, les digues, considérées comme ouvrages hydrauliques, ne doivent pas rompre de façon dangereuse pour les populations. En tant que moyen de prévention du risque d ' inondation ou de submersion, les performances et les

limites de ces digues doivent être connues avec précision. Les digues de protection constituent donc une question politique mise en évidence par plusieurs événements récents (Xynthia 2010, la NouvelleOrléans 2005, Rhône aval 2003, Gard 2002, Aude 1999). Cet ouvrage rassemble les contributions présentées lors du 2e colloque national Dignes maritimes et fluviales de protection contre les submersions (Dignes2013), organisé par l' Irstea et Promosciences, les 12, 13 et 14 juin 2013 au Centre des Congrès d' AixenProvence, avec le soutien du MEDDE, du CFBR, et de la Région ProvenceAlpesCôte d' Azur. Il s' adresse aux maîtres d' ouvrages, gestionnaires, concepteurs, constructeurs, enseignants et chercheurs, services de contrôle, organismes financeurs, agissant dans les domaines d' activités liés, directement ou indirectement, à la sûreté des digues maritimes et fluviales.

This book explores and interprets discourses and practices in school admissions to public lower secondary education in urban China by utilizing a discourse analysis approach and a case study method. It identifies continuities and changes in discourses shaped by diverse forces in public lower secondary school admissions in the context of China ' s social transformation from a profit-driven society to a more equitable society, and elucidates the power relationships among stakeholders in public school admissions by analysing their interplay in the process. More importantly, it exposes how current socio-economic, institutional and educational systems are shaping the engagement of stakeholders in the public school admissions process. It also presents some on-going projects intended to yield new policies and practices for more equitable public secondary education in China in the development stage of the post-2015.

As with many other languages, Mandarin Chinese exhibits a rich variety of ways in expressing the arguments of the predicator in a sentence. Unlike other languages, such variation is typically devoid of any formal marking. Previous attempts in explaining such phenomena usually focus on the syntax as an explanatory tool. This book argues that a large majority of such argument structure phenomena are better accounted for by recourse to enriched representations in lexical semantics. Drawing insights from conceptual semantics, cognitive semantics, Generative Lexicon, construction grammar and formal syntax, this book constitutes the first attempt at a comprehensive account of lexical semantic issues in Mandarin Chinese.

The world's most comprehensive, well documented, and well illustrated book on this subject. With extensive index. 372 photographs and illustrations. Free of charge in digital format on Google Books.
