The Netherland Dwarf rabbit is immensely popular in the UK and I have bred and exhibited them on and off for over 30 years now. This book was inspired by social media posts where breeders and owners expressed confusion or ignorance in either identifying the colour of their rabbits or requested information on what they would get if they crossed 2 x certain coloured rabbits or even sometimes what colour they should mate their rabbit to. A lot of misinformation often ensued with replies and so this book's synopsis was born. Please take this book as it was written... as in it's a Guide that is there for you to dip into if ever you are unsure of something or have a query. \*\*PLEASE NOTE: Although focused on the Dwarf rabbit the colour descriptions can be applied to most breeds so useful for Lops, etc. Also although this book is mainly UK biased I have where possible added the colour terms used in other countries as well but it is obviously impossible to add every name used around the world so please bear this in mind
