Share. Get Citation. Levy, J. (2017). Contemporary Urban Planning. New York: Routledge, <https://doi.org/10.4324/9781315619408>. COPY. Planning is a highly political activity. It is immersed in politics and inseparable from the law. Urban and regional planning decisions often involve large sums of money, both public and private, with the potential to deliver large benefits to some and losses to others.

John Levy is Professor Emeritus at Virginia Polytechnic Institute & State University in Blacksburg, VA, USA.

Updated in its 10th edition, Contemporary Urban Planning provides readers with in-depth coverage of the historic, economic, political, legal, and environmental factors affecting urban planning as well as specific chapters on the various fields of planning. With updated coverage of the Obama administration's response to the present economic downturn, the text addresses the most pressing issues in urban development today - including the subprime mortgage crisis and home foreclosures, federal funding for public transportation, and new standards for "green" buildings. The book also includes new material on the rapidly growing field of planning for natural catastrophes.

Based on the author's extensive experience as a working planner, this book gives readers an insider's view of sub-state urban planning--the "nitty-gritty" details on the interplay of politics, law, money, and interest groups. The author takes a balanced, non-judgmental approach to

introduce a range of ideological and political perspectives on the operation of political, economic, and demographic forces in city planning. Unlike other books on the subject, this one is strong in its coverage of economics, law, finance, and urban governance. It examines the underlying forces of growth and change and discusses frankly who benefits and loses by particular decisions. A four-part organization covers the background and development of contemporary planning; the structure and practice of contemporary planning; fields of planning; and national planning in the United States and other nations, and planning theory. For individuals headed for a career in planning.

Reflecting the author's many years of experience as a working planner, this volume focuses on public planning at the state, metropolitan, and particularly, the local level. Throughout, John M. Levy emphasizes politics, economics, ideology, law and the question of who benefits and who loses by particular decisions. The first half of the book presents a history of planning, the legal basis and political setting of planning, some of the social issues in planning, and the basics of land use controls and comprehensive planning. The second section contains chapters on various fields of planning - urban design, capital facilities planning, urban renewal and community development, transportation planning, economic development planning, growth management planning, environmental planning, and planning for metropolitan regions. The book concludes with a chapter on national planning and a chapter on planning theory.

Based on the author's extensive experience as a working planner, this book gives readers an insider's view of sub-state urban planning--the gritty-gritty details on the interplay of politics,

This book is recommended reading for planners preparing to take the AICP exam. Too often, no one is happy with new development: Public officials must choose among unappealing alternatives, developers are frustrated and the public is angry. But growing political support for urban design, developers' interest in community building and successful examples of redesigned cities all over the U.S. are hopeful signs of change. The author explains how design can reshape suburban growth patterns, revitalize older cities, and retrofit metropolitan areas where earlier development decisions went wrong. The author describes in detail specific techniques, materials, and technologies that should be known (but often aren't) to planners, public officials, concerned citizens, and others involved in development.

Essential microeconomic theory and applications for policy analysis, public administration, health care, environmental management, urban affairs, and urban planning.
