Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

From a Nebula Award winner: A "phenomenal," action-packed tale of crime, corruption, and cybernetics (Locus). Set in a divided near future, The Exile Kiss is author George Alec Effinger 's third book about the high-tech Arab ghetto called the Budayeen. It is a world filled with mind- or mood-altering drugs for any purpose; brains enhanced by electronic hardware, with plug-in memory additions and new personalities; and bodies shaped to perfection by surgery. Marid Audran, having risen from the rank of street hustler, is now an enforcer for Friedlander Bey, one of the most feared men in the Budayeen. But betrayal and exile send Marid and Bey out into the lifeless Arabian desert. Can they survive on their own? Will they make it back into hostile territory? Will they find their revenge? With this culmination of the sequence of Marid books, readers will quickly understand why this series is considered one of the great works of modern SF and a defining example of the cyber-punk genre.
