Truman's decision to use the atomic bomb on Hiroshima and Nagasaki resulted from the interplay of his temperament and several other factors, including his perspective on the war objectives defined by his predecessor, Franklin D. Roosevelt, the expectations of the American public, an assessment of the possibilities of achieving a quick victory by other means, and the complex American relationship with the Soviet Union. Although in later decades there was considerable debate about whether ...

As president, it was Harry Truman's decision if the weapon would be used with the goal to end the war. It is an awful responsibility that has come to us, the president wrote. President Truman had four options: 1) continue conventional bombing of Japanese cities; 2) invade Japan; 3) demonstrate the bomb on an unpopulated island; or, 4) drop the bomb on an inhabited Japanese city.

Radio broadcast to Japanese nation, August 15, 1945 [1] The decision to use the atomic bomb on Hiroshima and Nagasaki was controversial from the very start. This controversy has only increased as the memory of the Second World War has begun to fade, especially given that education systems generally put more emphasis on the suffering caused by the bombs than the reasons for using them (quite rightfully, in my opinion).

The decision to use the atomic bomb was a decision that brought death to over a hundred thousand Japanese. No explanation can change that fact and I do not wish to gloss it over. But this deliberate, premeditated destruction was our least abhorrent choice. The destruction of Hiroshima and Nagasaki put an end to the Japanese war.

Fifty years after the fateful summer of 1945, we are still debating Harry Truman's decision. Now, in an exhaustive, thoroughly documented study of the events of that time, Gar Alperovitz makes plain why the United States did not need to deploy the bomb, how Truman was advised of alternatives to it by nearly every civilian and military adviser, and how his final decision was later justified by what amounted to a deception - the claim that the action saved half a million to a million American ...

With a new preface by the author Controversial in nature, this book demonstrates that the United States did not need to use the atomic bomb against Japan. Alperovitz criticizes one of the most hotly debated precursory events to the Cold War, an event that was largely responsible for the evolution of post-World War II American politics and culture.

This book explores the American use of atomic bombs and the role these weapons played in the defeat of the Japanese Empire in World War II. It focuses on President Harry S. Truman's decision-making regarding this most controversial of all his decisions. The book relies on notable archival research and the best and most recent scholarship on the subject to fashion an incisive overview that is fair and forceful in its judgments. This study addresses a subject that has been much debated among historians and it confronts head-on the highly disputed claim that the Truman administration practised 'atomic diplomacy'. The book goes beyond its central historical analysis to ask whether it was morally right for the United States to use these terrible weapons against Hiroshima and Nagasaki. It also provides a balanced evaluation of the relationship between atomic weapons and the origins of the Cold War.

Looks at the decision-making process and struggle of Secretary of State Henry L. Stimson as he oversaw the American nuclear weapons program during World War II and his responsibility for using the atomic bomb against Japan.

This book is a balanced account of the political, diplomatic, and military currents that influenced Japan's attempts to surrender and the United States's decision to drop the atomic bombs. Based on extensive research in both the United States and Japan, this book allows the reader to follow the parallel decision-making in Tokyo and Washington that contributed to lost opportunities that might have allowed a less brutal conclusion to the war. Topics discussed and analyzed include Japan's desperate military situation; its decision to look to the Soviet Union to mediate the conflict; the Manhattan Project; the debates within Truman's Administration and the armed forces as to whether to modify unconditional surrender terms to include retention of Emperor Hirohito and whether to plan for the invasion of Japan's home islands or to rely instead on blockade and bombing to force the surrender.
