Nature-Based Solutions and Water Security: An Action Agenda for the 21st Century presents an action agenda for natural infrastructure on topics of standards and principles, technical evaluation and design tools, capacity building and innovative finance. Chapters introduce the topic and concepts of natural infrastructure, or nature-based solutions (NBS) and water security, with important background on the urgency of the global water crisis and the role that NBS can, and should play, in addressing this crisis. Sections also present the community of practice's collective thinking on a prioritized action agenda to guide more rapid progress in mainstreaming NBS. With contributions from global authors, including key individuals and organizations active in developing NBS solutions, users will also find important conclusions and recommendations, thus presenting a collaboratively developed, consensus roadmap to scaling NBS. Covers all issues of water security and natural infrastructures Presents a comprehensive state of synthesis, providing readers with a solid grounding in the field of natural infrastructures and water security Includes a fully workable and intuitive roadmap for action that is presented as a guide to the most important actions for practitioners, research questions for academics, and information on promising careers for students entering the field

A human-inspired, linguistically sophisticated model of language understanding for intelligent agent systems. One of the original goals of artificial intelligence research was to endow intelligent agents with human-level natural language capabilities. Recent AI research, however, has focused on applying statistical and machine learning approaches to big data rather than attempting to model what people do and how they do it. In this book, Marjorie McShane and Sergei Nirenburg return to the original goal of recreating human-level intelligence in a machine. They present a human-inspired, linguistically sophisticated model of language understanding for intelligent agent systems that emphasizes meaning--the deep, context-sensitive meaning that a person derives from spoken or written language.

Get competitive by learning to think strategically.The inability to set good strategy can sink a company, and a leader's career. A recent Wall Street Journal study revealed that the most sought-after executive skill is strategic thinking, but only three out of ten managers have this skill set.Horwath explains the three keys to strategic thinking, breaks them down into simple, attainable skills, and gives you practical tools to apply them every day, providing managers with a clear path to mastery of the three disciplines: 1. Acumen;generate critical insights through a step-by-step evaluation of your business and its environment2. Allocation;focus your limited resources through strategic trade-offs 3. Action;implement a system to guarantee effective execution of strategy at all levels of your organization Based on new research with senior executives from 150 companies and the author's experience as a thought-leading strategist, Deep Dive is the first book to focus on the most important level of strategy, you. Armed with this knowledge and dozens of effective tools, you can become a truly strategic leader for your organization.--Rich Horwath is the president of the Strategic Thinking Institute, a former chief strategy officer, and professor of strategy at the Lake Forest Graduate School of Management. As a thought-leading strategist, he has worked with such giants as Adidas, Amgen, and Pfizer. He is the author of four books and more than fifty articles on strategic thinking and has been profiled in business publications around the world, including Investor's Business Daily.
