JUST ALONG FOR A RIDE by Dennis Kurumada I leaned back on the seat and watched the back of Dick's head as he steered. The '55 DeSoto 1 rumbled along the rain-soaked street. This evening's gonna be a total loss, I thought. Things have gotta be pretty dull when all you've got to do is drive around with a friend who just got his license.

At the age of fifteen, Sam Jones's girlfriend Alicia gets pregnant and Sam's life of skateboarding and daydreaming about Tony Hawk changes drastically, so Sam turns to Hawk's autobiography for answers.

The interest in using Bayesian methods in ecology is increasing, however many ecologists have difficulty with conducting the required analyses. McCarthy bridges that gap, using a clear and accessible style. The text also incorporates case studies to demonstrate mark-recapture analysis, development of population models and the use of subjective judgement. The advantages

of Bayesian methods, are also described here, for example, the incorporation of any relevant prior information and the ability to assess the evidence in favour of competing hypotheses. Free software is available as well as an accompanying web-site containing the data files and WinBUGS codes. Bayesian Methods for Ecology will appeal to academic researchers, upper undergraduate and graduate students of Ecology.

Mel Brooks is often regarded as one of Hollywood's funniest men, thanks to such highly successful films as *The Producers*, *Blazing Saddles*, and *Young Frankenstein*. His films do have a tendency to turn out much like the jokes that comprise them--hit-or-miss, one minute shoot-the-moon brilliant and the next minute well short of laughs. This work provides a thorough synopsis and thematic analysis for each of his twelve films along with complete cast and production credits: *The Producers* (1968), *The Twelve Chairs* (1970), *Blazing Saddles* (1974), *Young Frankenstein* (1974), *Silent Movie* (1976), *High Anxiety* (1977), *History of the World--Part 1* (1981), *To Be or Not to Be* (1983), *Spaceballs* (1987), *Life Stinks* (1991), *Robin Hood: Men in Tights* (1993), and *Dracula: Dead and Loving It* (1995).

From Sean Connery to Roy Rogers, from comedy to political satire, films that include espionage as a plot device run the gamut of actors and styles. More than just "spy movies," espionage films have evolved over the history of cinema and American culture, from stereotypical foreign spy themes, to patriotic star features, to the Cold War plotlines of the sixties, and most recently to the sexy, slick films of the nineties. This filmography comprehensively catalogs movies involving elements of espionage. Each entry includes release date, running time, alternate titles, cast and crew, a brief synopsis, and commentary. An introduction analyzes the development of these films and their reflection of the changing culture that spawned them.

This essential text unpacks major transformations in the study of learning and human development and provides evidence for how science can inform innovation in the design of settings, policies, practice, and research to enhance the life path, opportunity and prosperity of every child. The ideas presented provide researchers and educators with a rationale for focusing on the specific pathways and developmental patterns that may lead a specific child, with a specific family, school, and community, to prosper in school and in life. Expanding key published articles and expert commentary, the book explores a profound evolution in thinking that integrates findings from psychology with biology through sociology, education, law, and history with an emphasis on institutionalized inequities and disparate outcomes and how to address them. It points toward possible solutions through an understanding of and addressing the dynamic relations between a child and the contexts within which he or she lives, offering all researchers of human development and education a new way to understand and promote healthy development and learning for diverse, specific youth regardless of race, socioeconomic status, or history of adversity, challenge, or trauma. The book brings together scholars and practitioners from the biological/medical sciences, the social and behavioral sciences, educational science, and fields of law and social and educational policy. It provides an invaluable and

unique resource for understanding the bases and status of the new science, and presents a roadmap for progress that will frame progress for at least the next decade and perhaps beyond.

Newly arrived in England from South Africa, a fifteen-year-old's family deteriorates, as the effects of living under apartheid take a toll on every aspect of the family members' lives.
