development from its earliest stage. Leyes and Fleming leap back nearly 50 years for a first look at small gas turbine engine development and the seven major corporations that dared to produce, market, and distribute the products that contributed to major improvements and uses of a wide spectrum of aircraft. In non-technical language, the book illustrates the broad-reaching influence of small turbines from commercial and executive aircraft to helicopters and missiles deployed in recent military engagements. Detailed corporate histories and photographs paint a clear historical picture of turbine

Global Finance on Screen is the first collection exclusively dedicated to a growing body of multi-format and multimedia audiovisual work that this book designates as the finance film. Finance film provides critical visualizations of the secretive, elitist, PR firewalled, and gender and race-biased world of finance, and its mysterious characters, jargon and products. It reconstructs for the screen and for broader audiences finance's logics, responsibilities, practices, and ethos, and traces the effects of money, markets, investment, credit, debt, bubbles, and crashes on our well-being,

desires, values, and actions. The chapters for this interdisciplinary collection are written by European and North American scholars in film studies, anthropology, business ethics, cultural studies, political economy, and sociology. They reveal and evaluate the ability of film to document financial cultures; reflect economic, cultural and political transformations related to financialization; indicate the alienating and exploitative consequences of the growing role played by financial services in the global economy; mobilize social action against finance's excesses; as well as spread
