Dürer's engraving *Melencolia I* (1514)—the first visual representation of artistic melancholy—this volume brings together contributions by scholars from a variety of disciplines. Topics include: *Melencolia I* and its reception; how melancholia inhabits landscapes, soundscapes, figures and objects; melancholia in medical and psychological contexts; how melancholia both enables and troubles artistic creation; and Sigmund Freud's essay "Mourning and Melancholia" (1917).

From the co-founder of THINX and hellotushy.com, start-ups collectively valued at more than \$150 million, comes *DISRUPT-HER*, a rallying cry for women to radically question the status quo. Miki Agrawal has faced patriarchal pushback, fought girl-on-girl hate, ridden the roller coaster of building businesses as a female CEO, and even overcome an attempt to burn her for witchcraft (figuratively). In order to navigate the complicated--at times maddening--struggles of contemporary femininity, we need an unabashed manifesto for the modern woman that inspires us to move past outrage and take positive steps on the personal, professional, and societal levels. This manifesto galvanizes us to action in 13 major areas of our lives with as much fire power as possible. These are the credos we live by, the advice we give to friends, the tenets we instill in our companies and peers

on a daily basis. Stories of badass female movers and shakers are shared in this book too to give you an extra jolt of "I've got this." It's a whole body F*CK YES to your work, your love, your relationships, and your mission--while doing it all authentically, unapologetically, and with full integrity.

Getting our voices heard can be a nerve-racking and overwhelming task - particularly in a world where everyone seems to have something to say. The ability to present our ideas with confidence is now a coveted skill. Yet on stage, we become this other person: less funny, less engaging, less human. Mark Shayler draws on his own experience - from nervous speaker to charismatic compere - to guide you through the task of public speaking. He takes a deeper look at what's holding you back, and will help you to: Find your voice and the confidence to share it Learn how to tell stories, not just share data Stand and move around the stage comfortably Leave the audience informed, entertained and uplifted Giving a brilliant talk is not about following a method. It's not about rules. It's about understanding what you want the audience to think, feel and do afterwards. Ultimately, it's about being more you.

Thinkers50 Management Thinker of 2015 Whitney Johnson wants you to consider this simple, yet powerful, idea: disruptive companies and

ideas upend markets by doing something truly different--they see a need, an empty space waiting to be filled, and they dare to create something for which a market may not yet exist. As president and cofounder of Rose Park Advisors' Disruptive Innovation Fund with Clayton Christensen, Johnson used the theory of disruptive innovation to invest in publicly traded stocks and private early-stage companies. In *Disrupt Yourself*, she helps you understand how the frameworks of disruptive innovation can apply to your particular path, whether you are: a self-starter ready to make a disruptive pivot in your business a high-potential individual charting your career trajectory a manager looking to instill innovative thinking amongst your team a leader facing industry changes that make for an uncertain future We are living in an era of accelerating disruption; no one is immune. Johnson makes the compelling case that managing the S-curve waves of learning and mastery is a requisite skill for the future. If you want to be successful in unexpected ways, follow your own disruptive path. Dare to innovate. Do something astonishing. Disrupt yourself.

This special issue of the International Journal of Psychology had its origins in the Quebec 98 Conference on Short-Term Memory, held in Quebec City, Canada, in June 1998. Following this conference, participants were

invited to submit contributions based on, and expanding upon, their presentation at this conference. The enthusiastic response made it possible to collect the exciting selection of articles that you will find herein. It must be noted that because of the finite journal space available, the editors and reviewers were faced with the difficult problem of selecting only a limited number of the excellent articles that were submitted. The outcome of this process is this special issue, which we believe provides an up-to-date overview of current research on short-term/working memory, including the challenges, controversies, and recent theoretical advances in this field.

Clay Christensen's groundbreaking bestselling work in education now updated and expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education. "Provocatively titled, *Disrupting Class* is just what America's K-12 education system needs--a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." -Joel Klein,

Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." -Jim Collins, bestselling author of Good to Great "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. Disrupting Class is a must-read, as it shows us how we can blaze that trail toward transformation." -Jeb Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically-we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time-education-and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will

help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every student Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform We can compete in the global classroom-and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, Disrupting Class will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.
