This book tells the complete BMW 5 series story, in the pre-Bangle classic era, covering e12, e28, e34 and e39 models, the enthusiast cars that invented the modern sports sedan and created BMW's ultimate driving machine image. Follow the evolution of BMW's middle child through the decades in all major markets. Marvel at the mystique of BMW's motorsport and exotic tuner cars reaching the 180mph milestone on V8 power. Consider BMW's phoenix-like rise from the ashes of WWII, regaining its sports, luxury reputation, and powering on to become the ultimate business machine under chairman Eberhard von Kuenheim. This new paperback edition features 22 new images, and new information about the genesis of BMW Motorsport GmbH and its early cars. Marc Cranswick has been writing on the subject of classic high performance German cars for many years. He has been involved with BMW since the e12 and e21 were current models.

BMW is a company associated with motoring firsts. The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972. As BMW's "middle child," the 5 series has drawn features from the company's smallest and largest models, establishing a reputation for performance and practicality through multiple generations. This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the time of and reasons for their introduction. Several aspects of BMW's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. The book includes more than 200 photographs.
