Economic Development is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies so students see how theory relates to the problems and prospects of developing countries

Economic Development , 10/e is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Principles and Concepts: Economics, Institutions, and Development: A Global Perspective; Comparative Economic Development; Classic Theories of Economic Growth and Development; Contemporary Models of Development and Underdevelopment. Problems and Policies: Domestic: Poverty, Inequality, and Development; Population Growth and Economic Development: Causes, Consequences, Controversies; Urbanization and Rural-Urban Migration: Theory and Policy; Human Capital: Education and Health in Economic Development; Agricultural Transformation and Rural Development; The Environment and Development; Development Policymaking and the Roles of Market, State, and Civil Society. Problems and Policies: International and Macro: International Trade Theory and Development Strategy; Balance of Payments, Developing-Country Debt, and Issues in Macroeconomic Stabilization; Foreign Finance, Investment, and Aid: Controversies and Opportunities; Finance and Fiscal Policy for Development; Some Critical Issues for the Twenty-First Century. For all readers interested in economic development.

This collection of Todaro's essays focuses on a wide range of topics in economic development, including rural-urban migration, international legal and illegal migration, population growth, technological change, education, the environment and ethics.

The book is orientated towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations and fills a major void in the teaching materials available for this purpose. It has been written for use by first-year economic students at universities throughout Africa, Asia, Latin America and the Middle East.

Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more, with analytical rigor as well as engaging examples and policy discussions. They take a broad approach to theoretical analysis, using both standard economic and ecological analyses, and developing these both from theoretical and practical points of view. It assumes a background in basic economics, but offers brief review sections on important micro and macroeconomic concepts, as well as appendices with more advanced and technical material. Extensive instructor and student support materials, including PowerPoint slides, data updates, and student exercises are provided.

This classic, bestselling textbook provides a comprehensive introduction to the field of development economics. The 10th edition of Tony Thirlwall's book, now co-written with Penélope Pacheco-López, provides a clear, comprehensive and rigorous introduction to the theory of development economics and the experience of developing countries. Balancing a historic approach with current data and references, it provides a wide-ranging analysis of the subject. This all-inclusive methodology succeeds at representing different schools of thought with a balance of micro and macro topics. An ideal textbook for undergraduate students of economics and other social sciences, it is also suitable for upper undergraduate and master's level modules on development economics as an option on a non-economics degree. New to this Edition: - A brand new chapter on human capital:education, nutrition, health, and therole of women in development - New material on the Sustainable Development Goals, the measurementof poverty, and the multidimensional poverty index - Discussion of randomized control trials - The role of structural change in economic development - New IMF lending facilities

Compelled by the extent to which globalization has changed the nature of labor relations, Harry C. Katz, Thomas A. Kochan, and Alexander J. S. Colvin give us the first textbook to focus on the workplace outcomes of the production of goods and services in emerging countries. In Labor Relations in a Globalizing World they draw lessons from the United States and other advanced industrial countries to provide a menu of options for management, labor, and government leaders in emerging countries. They include discussions based in countries such as China, Brazil, India, and South Africa which, given the advanced levels of economic development they have already achieved, are often described as "transitional," because the labor relations practices and procedures used in those countries are still in a state of flux. Katz, Kochan, and Colvin analyze how labor relations functions in emerging countries in a manner that is useful to practitioners, policymakers, and academics. They take account of the fact that labor relations are much more politicized in emerging countries than in advanced industrialized countries. They also address the traditional role played by state-dominated unions in emerging countries and the recent increased importance of independent unions that have emerged as alternatives. These independent unions tend to promote firm- or workplace-level collective bargaining in contrast to the more traditional top-down systems. Katz, Kochan, and Colvin explain how multinational corporations, nongovernmental organizations, and other groups that act across national borders increasingly influence work and employment outcomes.

This book examines general Nongovernmental organizations (NGOs) roles and comparative advantages in the broad fight to end global poverty, as well as roles and opportunities specific to particular Millennium Development Goals sectors.

Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.
