This Circular provides guidance for Executive Branch entities required to submit audited financial statements, interim financial statements, and Performance and Accountability Reports (PARs) or Agency Financial Reports (AFRs) under the Chief Financial Officers Act of 1990, as amended (CFO Act), the Government Management Reform Act of 1994 (GMRA), and the Accountability of Tax Dollars Act of 2002 (ATDA). This Circular also provides general guidance to Government corporations required to submit Annual Management Reports (AMRs) under the Government Corporations Control Act. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. https://usgovpub.com

The history and rapid development of minor planet dis In addition to citing the bibliographic source of the nam covers constitute a fascinating story and one with a ing, we also provide the source of numbering. A spe rather breathtaking evolution. By October 2005, the cial concordance list will enable the evaluation of the total of numbered planets exceeded the remarkable cor respective publication dates. The complete work is, nerstone of 100,000 objects and only three years later of course, a thoroughly revised and considerably en in November 2008 we are even faced with minor planet largest data collection and every e'ort has been made () 200000. This dramatic evolution must be compared to check and correct each single piece of information () with the huge time span of two centuries 1801–2000 again. For even more detailed information on the dis that was necessary to detect and to re'ne the orbits of covery circumstances of numbered but unnamed plan only the 'rst 20,000 minor planets. Nowadays, we need ets, the reader is referred to the extensive data 'les even less than 13 months for the same quantity! At the compiled by the Minor Planet Center. end of 2005, we had achieved a total of 12,804 named (According to a resolution of IAU Division III 2000, minor planets a fraction of less than 11 per cent of j) Manchester IAU General Assembly DMPN attained all numbered minor planets.

This book offers an insight into the approaches taken by industry and academia to address GPCRs and depict how mature this target class-oriented research has become in the last decade. Coverage also reflects the actual trends in the fast-emerging field of GPCR research in academia and industry. It is based on the international workshop GPCRs: From Deorphanisation to Lead Structure Identification, held in Berlin in May 2006.

Three significant changes have impacted the teaching of social studies to young adolescents in the past decade: (1) development of the curriculum standards for social studies by the National Council for the Social Studies (NCSS); (2) growth in the number of middle schools, which are premised on the integration of content; and (3) expansive use of children's literature in social studies. This book is in response to those innovations which are explained in two parts: (1) provides a rationale for using trade books in social studies and details strategies for nurturing students' reading comprehension; and (2) provides annotations for more than 250 trade books, along with ideas for classroom use, and recommends 150+ additional titles. An index by title and an index by subject are also included. (BT)

For the last 6000 years turmeric has been used in Ayurvedic medicine to alleviate pain, balance digestion, purify body and mind, clear skin diseases, expel phlegm, and invigorate the blood. Nowadays, this plant has acquired great importance with its anti-aging, anti-cancer, anti-Alzheimer, antioxidant, and a variety of other medicinal properties. The need of the hour is to verify and validate the traditional uses by subjecting them to proper experimental studies. To do this effectively there needs to be a single comprehensive source of the knowledge to date. Turmeric: the genus *Curcuma* is the first comprehensive monographic treatment on turmeric. It covers all aspects of turmeric including botany, genetic resources, crop improvement, processing, biotechnology, pharmacology, medicinal and traditional uses, and its use as a spice and flavoring. Bringing together the premier experts in the field from India, Japan, UK, and USA, this book offers the most thorough examination of the cultivation, market trends, processing, and products as well as pharmacokinetic and medicinal properties of this highly regarded spice. While Ayurveda has known for millennia that turmeric cleanses the body, modern science has now discovered that it produces glutathione-s-transferase that detoxifies the body and therefore strengthens the liver, heart, and immune system. By comparing traditional uses with modern scientific discoveries, the text provides a complete view of the medicinal value and health benefits of turmeric. Heavily referenced with an exhaustive bibliography at the end of each chapter, the book collects and collates the currently available data on turmeric. Covering everything from cultivation to medicine, Turmeric: the Genus *Curcuma* serves as an invaluable reference for those involved with agriculture, marketing, processing or product development, and may function as a catalyst for future research into the health benefits and applications of turmeric.

Short-horned lizards (*Phrynosoma douglasii* species complex) occur throughout the inter-montane West and Great Plains of western North America. The comparative morphology and color pattern variation of short-horned lizards was studied in 3,174 specimens. Multivariate analyses of 20 morphological and color-pattern characters were applied to 977 specimens, and univariate statistics were summarized for 52 samples totaling 1,134 specimens. The results of the morphological data analyses support the recognition of *P. douglasii* (Bell 1828) as a distinct species, and the resurrection of *P. brevirostris* Girard 1858a and *P. ornatum* Girard 1858a as species distinct from *P. hermandesi* Girard 1858a. Two new species allied to *P. brevirostris* are described: *P. baeri* sp. nov. from the eastern plains of Colorado and northeastern New Mexico, southeastern Wyoming and southwestern Nebraska south of the North Platte River, and *P. diminutum* sp. nov. endemic to the San Luis Valley of southern Colorado and northern New Mexico. The Mexican taxon *brachycercum* Smith 1942 is reassigned as a subspecies of *P. ornatum*, based on non-discrete character differences and overall morphometric similarity. The ranges of *P. hermandesi* and *P. ornatum* broadly overlap in central New Mexico, the former taxon occupying the coniferous forests of disjoint mountain ranges, the latter occurring in the surrounding desert grasslands. Principal components analysis has revealed morphological evidence of hybridization where the two taxa meet, generally within ecotones between montane forest associations and grasslands. Principal components analysis has also revealed a high level of morphological variability in populations occurring in the Colorado Plateau region of northeastern Arizona, northwestern New Mexico, extreme southwestern Colorado and adjacent Utah. The evidence suggests that these populations arose through past hybridization between the two species. The taxon *ornatum* Girard 1858b, although sharing several traits with *P. brevirostris*, is morphologically close to *P. hermandesi*. It is regarded as a stabilized population of hybrid origin, but treated taxonomically as a subspecies of *P. hermandesi*. The taxonomic arrangement in this study, with the exception of *P. douglasii*, is largely discordant with the proposed taxonomy from a previously published study based on mitochondrial DNA sequence data.

This book provides an overview of theoretical thinking about the communicative scope of emotional expressions as well as an overview of the state of the art research in emotional psychology. For many years, research in emotional psychology has been primarily concerned with the labeling of emotion expressions and the link between emotion expressions and the expresser's internal state. Following recent trends in research devoting specific attention to the social signal value of emotions, contributors emphasize the nature of emotion expressions as information about the person and the situation, including the social norms and standards relevant to the situation. Focusing on the role of emotion expressions as communicative acts, this timely book seeks to advance a line of theoretical thinking that goes beyond the view of emotion expressions as symptoms of an intrapersonal phenomenon to focus on their interpersonal function. The Social Nature of Emotion Expression will be of interest to researchers in emotional psychology, as well as specialists in nonverbal behavior, communication, linguistics, ethology and ethnography.
