This sourcebook is the detailed review of the chemistry, manufacturing processes, and uses of resorcinol and its derivatives. Citing over 1,900 references, the author clearly explains the chemical's complex development, discussing the many tests, techniques, and instruments used.

Prepare to learn about two things that don't seem to go together-fetishes and parties! Written by PVC Leatherman with a foreward [sic] by Randy LaBido, The Fetish Party is the ideal book for you to find out exactly how taboo activities and socially acceptable ones meet under one roof. Fetish parties are unlike any parties you experienced before! They are vastly different, yet in some ways, the same. This is your personal introduction to the fascinating, and very misunderstood, feared, and reviled world of fetish parties. And by personal, PVC Leatherman regales you with anecdotes from his night as a fetish party virgin,to now, when he is a practically an instigator and ringleader! If you are curious about the fetish lifestyle, meaning curiousenough to want to go to your first fetish party, you want to know what to expect. This book tells you what to expect whether you go alone, or not. Instead of floggers, paddles, violet wands, hot candle wax, bondage rope, riding crops, wrist and ankle cuffs, making you nervous, you will want to experience them. Instead of thinking spankings are for children, considering getting your shoes kissed or feet worshiped is gross, or seeing a guy dressed in a corset and high heels is weird, you will realize they are different ways people have fun in nonjudgmental ways. And those kinky people in leather, latex, and vinyl, will no longer be perverts or a mystery, but friends, dancer partners, and play partners. You would no longer be on the outside. You'd be in an underworld of energy, excitement, pleasure, and pain...and loving it! Get ready to immerse yourself with all the minor and major details needed to navigate any fetish party with comfort, confidence, and ease.

Stephen Pople, one of today's most respected science authors, has created a totally new physics book to prepare students for examinations. Complete Physics covers all syllabuses due to a unique combination of Core Pages and Further Topics. Each chapter contains core material valid for all syllabuses. Further Topics at the end can be selected to provide the right mix of pages for the syllabus you are teaching. Key Points: · Totally new book constructed from an analysis of all GCSE Physics syllabuses including IGCSE, CXC, and O'Level · Sets the traditional principles of physics in a modern and global perspective and uses illustrations with a worldwide context · Extra topics to give a truly rounded curriculum · Double-page spread format · Ideal for those students intending to take physics to a more advanced level

This booklet contains all the safety and health standards specific to the Shipyard Industry contained in Title 29 Code of Federal Regulations (CFR) Part 1915, as of July 1, 2008. Also included are brief discussions of the following: 1. The importance of regular employee training to establish and reinforce employee awareness in the areas of job safety and health. 2. The elements of a safety and health program that can be used by employers to develop effective programs at their worksites. A brief description of the OSHA Consultation Program, which is available to assist employers, is also included at the end of this publication. Hazards not covered by Shipyard Industry standards may be covered by General Industry standards contained in 29 CFR Part 1910 (OSHA website: www.osha.gov). Where a hazard is covered by both the Shipyard Industry standards and the General Industry standards, only the Shipyard Industry standard will be cited by OSHA inspectors (described in more detail in 29 CFR 1910.5, Applicability of Standards). In addition, OSHA regulations regarding general agency practices and procedures are applicable to shipyard employment. Particular attention is directed to the provisions of 29 CFR Part 1904, Recording and Reporting Occupational Injuries and Illnesses. There are no geographical limitations to the maritime jurisdiction on shore other than the limitations of the Occupational Safety and Health Act itself. Employees of employers performing shipyard activities on the shore, pier, terminal, yard, shipyard, machine shop, riverbank, etc., as well as on the vessels afloat or in drydocks or graving docks are covered by the Shipyard standards.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.
