I treat it kindly and change the oil every 5000ks and the filter at 10000ks. I've towed a caravan to Perth and back as well as towing the van right up the beach on Fraser Island a couple of times.

What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You 'll find the answers in this dizzyingly erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology, philosophy, literature, particle physics, and cosmology, The Book of Nothing explores the enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the vanishing point of our knowledge.

Sometimes photographers have to shoot in less than ideal lighting situations. Maybe the wedding is mid-day in the middle of a field, or perhaps the event is in a florescent-lit room. These scenarios can be particularly intimidating for beginning photographers who don't know how to handle the many undesirable lighting situations they may encounter. In Shooting in Sh*tty Light, professional photographers Lindsay Adler and Erik Valind cover the top ten worst lighting situations and provide a variety of solutions for each. They explain which solutions are most practical and why one option might be preferable over another, examining such problems as extremely low lighting when no flash is allowed, strong backlight, and the light on an overcast day. Unlike other books that focus on natural light or lighting in general, this book addresses a very real need of beginning photographers, answering the question, "What do I do when the lighting is terrible?" Lindsay and Erik candidly show you the tools at your disposal, demonstrating the techniques essential to getting the job done with minimal fuss. Shows how to deal with ten of the worst lighting situations, such as harsh midday light, extremely low light, and mixed light. Offers real-life examples and practical solutions for handling poor light, such as identifying natural reflectors, bouncing light off a wall, or utilizing flash gels. Features a fun, conversational style to help you conquer the fear of poor lighting and approach any lighting situation with confidence!
