and the accompanying agricultural terraces and structures that have survived for more than six centuries are a testament to the advanced engineering and construction skills of the Inca people. The Qhapaq nan also spurred an important process of ecological and community integration across the Andean region. This book, the companion volume to a National Museum of the American Indian exhibition of the same name, features essays on six main themes: the ancestors of the Inca, Cusco as the center of the empire, road engineering, road transportation and integration, the road in the Colonial era, and the road today. Beautifully designed and featuring more than 225 full-color illustrations, The Great Inka Road is a fascinating look at this enduring symbol of the Andean peoples' strength and adaptability.

Questions

This book is a study of how the theories and actual practices of a Pan-Asian empire were produced during Japan's war, 1931 – 1945. As Japan invaded China and conducted a full-scale war against the United States in the late 1930s and early 1940s, several versions of a Pan-Asian empire were presented by Japanese intellectuals, in order to maximize wartime collaboration and mobilization in China and the colonies. A broad group of social scientists – including R. Yama Masamichi, Kada Tetsuji, Ezawa Junji, Takata Yasuma, and Shinmei Masamichi – presented highly politicized visions of a new Asia characterized by a newly shared Asian identity. Critically examining how Japanese social scientists contrived the logic of a Japan-led East Asian community, Part I of this book demonstrates the violent nature of imperial knowledge

production which buttresses colonial developmentalism. In Part II, the book also explores questions around the (re)making of colonial Korea as part of Japan ' s regional empire, generating theoretical and realistic tensions between resistance and collaboration. Japan ' s Pan-Asian Empire provides original theoretical perspectives on the construction of a multi-ethnic and multi-cultural empire. It will appeal to students and scholars of modern Japanese history, colonial and postcolonial studies, as well as Korean studies.

The Roman empire afforded a kaleidoscope of sensations. Through a series of multisensory case studies centred on people, places, buildings and artefacts, and on specific aspects of human behaviour, this volume

Questions

develops ground-breaking methods and approaches for sensory studies in Roman archaeology and ancient history. Authors explore questions such as: what it felt like, and symbolised, to be showered with saffron at the amphitheatre; why the shape of a dancer ' s body made him immediately recognisable as a social outcast; how the dramatic gestures, loud noises and unforgettable smells of a funeral would have different meanings for members of the family and for bystanders; and why feeling the weight of a signet ring on his finger contributed to a man ' s sense of identity. A multisensory approach is taken throughout, with each chapter exploring at least two of the senses of sight, hearing, smell, taste and touch. The contributors ' individual approaches vary, reflecting the possibilities and the wide application of sensory studies to the ancient world. Underlying all chapters is a conviction that taking a multisensory approach enriches our
