Thomas Blantz's monumental *The University of Notre Dame: A History* tells the story of the renowned Catholic university's growth and development from a primitive grade school and high school founded in 1842 by the Congregation of Holy Cross in the wilds of northern Indiana to the acclaimed undergraduate and research institution it became by the early twenty-first century. Its growth was not always smooth—slowed at times by wars, financial challenges, fires, and illnesses. It is the story both of a successful institution and of the men and women who made it so: Father Edward Sorin, the twenty-eight-year-old French

Hesburgh, president for thirty-five years; the 325 undergraduate young women who were the first to enroll at Notre Dame in 1972; and thousands of others. Blantz captures the strong connections that exist between Notre Dame's founding and early

programs for undergraduates, provides a short section on selected consortia, and suggests ideas for widening international education. The programs selected for this volume met certain criteria. In addition to being effective, the programs do not place a large strain on institutional budgets and can be easily adapted by others. The volume is arranged into four chapters. Chapter I, the largest section, describes over 60 two-year and four-year college and university programs. Chapter II describes six consortia programs. Each description includes a brief introduction to the institution and an overview of the international aspects of the curriculum as well as information about how the international aspects are organized, the educational impact, and the resource persons who can be contacted for further information. Chapter III presents worthwhile, imaginative ideas that are
